My family's enjoyment of food is in my care; therefore—

I will prepare and serve all foods as appealing to the eye and palate as I can. Stretching the food peso is part of my responsibility; therefore—

I will take such care of foods that none will spoil.

I will use left-overs with thought and skill. Well-prepared foods and appetizing meals are creative achievements; therefore—

I shall bring food to the table that satisfies and pleases my family.

PREFACE

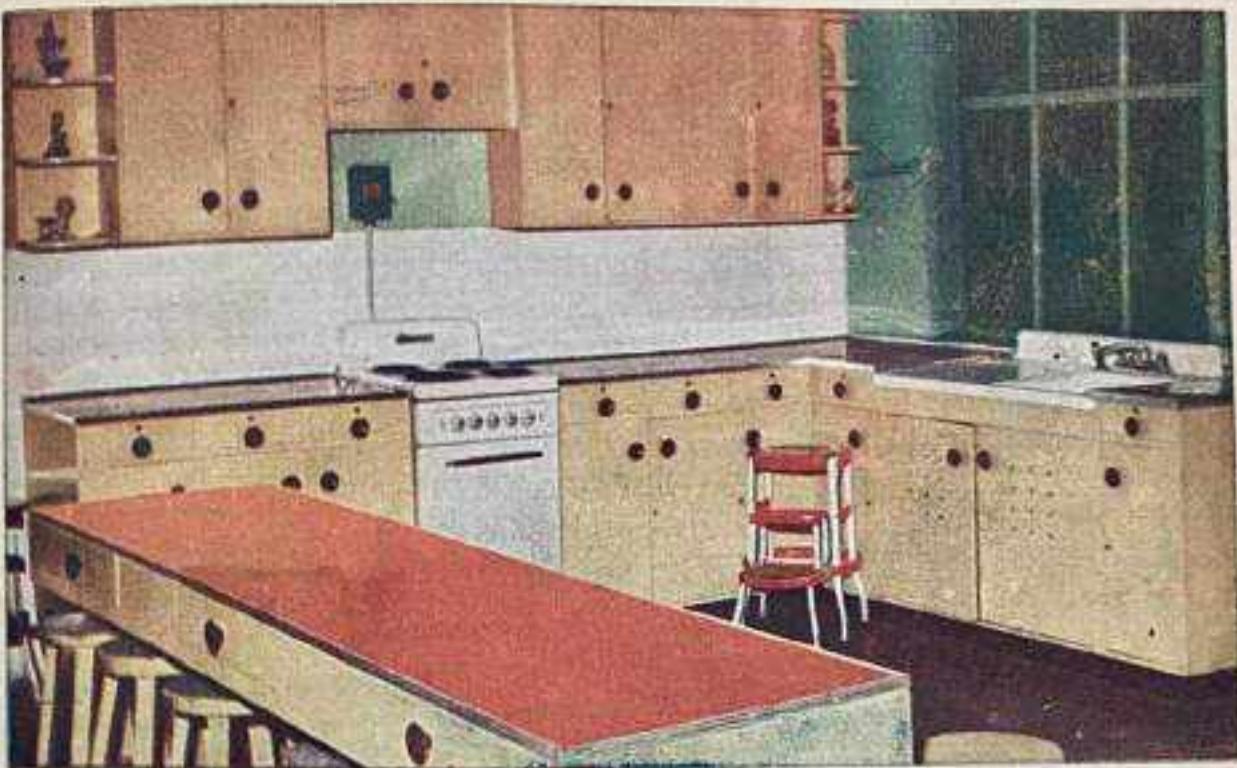

This Cookery Guide has been written as a humble contribution to the preparation of the woman in meeting her most important responsibility in Homemaking and in response to the need of homes and institutional management in general. It is a product of research and experiences acquired throughout the years in which the author has been connected with the preparation of foods in the College of Home Economics and the Culinary Art Department of the Centro Escolar University. It also includes preparations for children and Diet Therapy which are oftentimes neglected in culinary literature.

The present work is a resourceful and cultural presentation of foods of different nations with emphasis on Philippine dishes including regional recipes. All have been scientifically prepared, artistically presented, tested and served in the Home Economics classes and on social occasions in the Centro Escolar University.

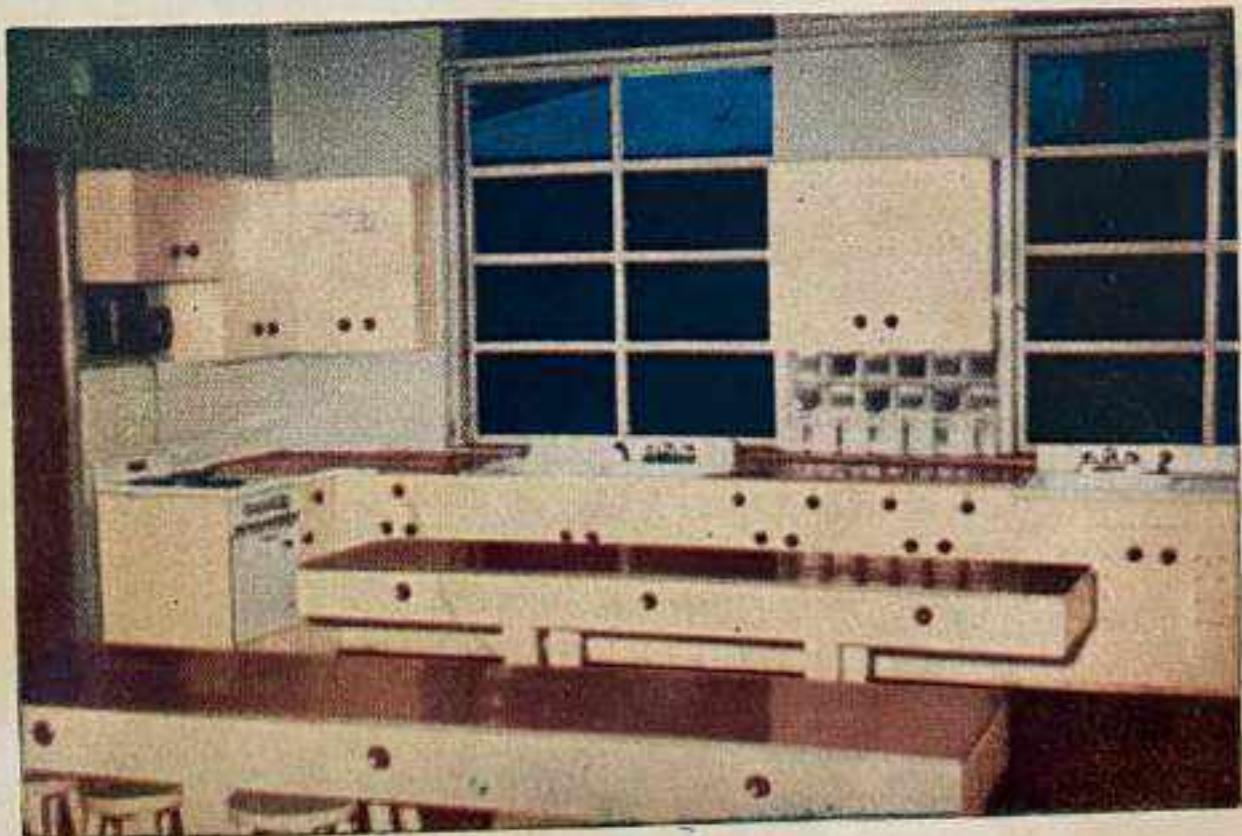

The colored illustrations, prepared in the University, are portrayals of the refinement appealing to both the eye and the palate without neglecting the requirements of good health.

It is hoped that, by following strictly the instructions for, and specific requirements of, the contents herein presented, the reader will find this book a satisfactory guide.

APPETIZERS

CANAPE BASES

Canapé bases should be dainty but firm enough to be held with the fingers. Plain or toasted bread, crackers, various types of pastry bases, potato chips and many novelty bases serve the purpose. Bread and cracker bases are most commonly used.

All canapé bases other than untoasted bread should be crisp. If they are the least bit limp, heating in a moderate oven about 10 minutes will usually restore crispness.

BREAD BASES

Bread one day old is preferable to fresh bread, except for rolled canapés such as cheese rolls which require soft bread. Cut the bread in thin slices about $\frac{1}{4}$ inch thick; remove crusts. Cut into desired shapes with sharp knife or cookie cutters. Bread rounds should be from $1\frac{1}{4}$ to 2 inches in diameter; bread fingers about 1 by 2 inches; squares $1\frac{1}{2}$ to 2 inches; other shapes corresponding in size. Use untoasted bread, or toasted or sautéed on one side.

TO SAUTÉ BREAD BASES:

Cut the bread into desired shapes. Sauté on one side in a small amount of butter over low heat. Spread topping on the untoasted side and garnish as desired. Toasted or sautéed bread should be used only when canapés are to be served soon after preparation.

CRACKER BASES

Many crisp crackers are suitable for use as canapé bases. They may be simply brushed with melted butter and toasted lightly in a moderate oven or sprinkled before toasting with paprika, onion salt, celery salt, garlic salt or grated cheese.

CANAPE BUTTERS

Combine the softened butter and other ingredients as directed below. Blend thoroughly and store in a covered container in the refrigerator until ready for use. Cream the mixture until of spreading consistency. Spread on the canapé bases and garnish as desired.

ANCHOVY BUTTER:

To $\frac{1}{2}$ cup butter add 2 tablespoons anchovy paste and $\frac{1}{2}$ teaspoon horseradish.

CAVIAR BUTTER:

To $\frac{1}{2}$ cup butter add 3 tablespoons caviar and $\frac{1}{2}$ teaspoon lemon juice.

CHUTNEY BUTTER:

To $\frac{1}{2}$ cup butter add $\frac{1}{4}$ cup chutney relish.

CURRY BUTTER:

To $\frac{1}{2}$ cup butter add 2 teaspoons curry powder and 1 teaspoon lemon juice.

YOUR COOKERY GUIDE

2

LEMON BUTTER:

To $\frac{1}{2}$ cup butter add 1 tablespoon lemon juice and $\frac{1}{4}$ teaspoon grated lemon rind. Lime juice and rind may be substituted.

MUSTARD BUTTER:

To $\frac{1}{2}$ cup butter add 2 tablespoons prepared mustard.

PIMENTO BUTTER:

To $\frac{1}{4}$ cup butter add 2 tablespoons pimiento rubbed through a sieve, a dash of cayenne and 1 teaspoon chopped green olives.

ROQUEFORT BUTTER:

To $\frac{1}{4}$ cup butter add $\frac{1}{4}$ cup Roquefort cheese and $\frac{1}{2}$ teaspoon Worcester-shire sauce.

SHRIMP BUTTER:

To $\frac{1}{2}$ cup butter add 3 tablespoons shrimp paste or purée, 1 teaspoon lemon juice, and $\frac{1}{8}$ teaspoon paprika.

CANAPE SPREADS

Most canapé spreads are less soft and smooth than canapé butters and are usually piled more generously on cracker and toast bases. Garnish as desired with sliced stuffed olive, pimiento, parsley, water cress or any other suitable garnish.

CHEESE-OLIVE SPREAD:

Blend $\frac{1}{4}$ cup grated soft sharp cheese with $\frac{1}{4}$ cup softened butter; add $\frac{1}{4}$ cup finely chopped olives. Season to taste with salt, pepper and a dash of Tabasco seasoning.

Blend $\frac{1}{4}$ cup grated cheese with $\frac{1}{4}$ cup drained chili sauce.

CREAM-CHEESE-CHUTNEY SPREAD:

Blend $\frac{1}{3}$ cup package of cream cheese with $\frac{1}{3}$ cup chutney.

CANAPES

HORS D'OEUVRES

HORS D'OEUVRES

The French phrase "hors d'oeuvres" is used to describe savory little appetizers or relishes other than canapés. The familiar celery and olives served at the beginning of a meal are hors d'oeuvres. So are carrot sticks and other vegetable relishes and pickles. Many hors d'oeuvres, hot or cold, are served on the ends of toothpicks, usually with cocktails or other beverages.

Assorted hors d'oeuvres may be arranged on a large tray or platter. Hors d'oeuvres are served on toothpicks which can be tucked into hors d'oeuvre holders and used as a centerpiece. Homemade holders of vegetables or fruit will serve the purpose admirably. Choose a well-formed cabbage, eggplant, cucumber, orange, red apple or other suitable fruit. Remove a slice from the bottom if necessary to make it stand upright. Stick the free ends of the toothpicks into the vegetable or fruit, spacing them evenly.

OYSTERS A LA BROCHETTE

Scald the oysters; separate the meat from the shell; season with salt, fine herbs, truffles and sweet pepper. Sprinkle oil, pepper, and salt. Leave in the solution for several minutes.

Pierce the oyster with a toothpick alternately with a square of bacon. Roll in bread crumbs and broil over charcoal for several minutes.

OYSTERS ON THE HALF-SHELL

3 dozens oysters on the half-shell	Lemon
Grated cheese	Ice

Serve the oysters with their shells imbedded in ice and thoroughly chilled, allowing 1 tablespoon of grated cheese for each shell. Garnish with lemon sections.

PIRAMIT

Kraft cheese	Cucumber
Ham	Sweet cucumber
	Pickles and onions

Cut all the ingredients into cubes. Pierce them with a toothpick in the order given or in the reverse order with the onions first.

PRUNE AND OLIVE APPETIZERS

Remove the pits of prunes and insert a small stuffed olive in each. Wrap each prune in a small piece of bacon and secure with a toothpick. Broil until bacon is crisp, turning to assure uniform crispness. Serve at once.

SAUSAGE - STUFFED PRUNES

Remove the pits from large prunes and fill each with a tiny cocktail sausage. Place them in a well-buttered dish and bake them in a very hot oven until the sausages begin to brown. Serve on toothpicks when slightly cooled.

SHRIMPS AND EGGS

Cook the shrimps. Clean and remove the intestines. Chop them finely. For each cup of shrimps, put 1 hard-boiled egg, 1 or 2 spoons of butter or mayonnaise. Season with salt, pepper and paprika.

Have the prepared bread which has been fried in oil, or toasted, cut in rounds the size of a peso. Place the mixture in the center of the bread, decorating it with a shrimp and dots of mayonnaise.

SKEWERED CHICKEN LIVERS

6 chicken livers
 $\frac{1}{4}$ cup mushrooms

$\frac{1}{4}$ cup bacon, sliced
 Oil or butter

Cut each liver into 4 pieces. Put them in a frying pan with water, over a very hot fire to sear them. Blanch about 15 square pieces of bacon, then sauté them in butter. Cook in butter some sliced mushrooms. Then pierce with wooden skewers, alternating a slice of liver, a piece of bacon, and a slice of mushroom. Each skewer should contain 3 of each kind. Coat the skewers and cook on a grill, basting with oil or butter. Serve on *maitre d'hotel* butter with a little water cress or an appropriate vegetable.

TUNA FISH EN BARQUETTES

Mash the contents of 1 can of tuna fish in oil, adding 50 grams butter and 2 tablespoons olive oil. Season and stir until it forms a paste. Make rolls about 4 inches long and thick enough to be $\frac{3}{4}$ inch in diameter. Chill. Then cut into pieces $\frac{1}{2}$ inch long. Cut slender carrots crosswise into slices $\frac{1}{8}$ inch thick. Stick a slice of carrot and dried beef roll on each toothpick. Place toothpicks in holder or stick into a grape fruit or an apple or some other base placed on appetizer tray.

Remove tiny end sprigs of water cress for garnish. Of bread strip, roll as for jelly roll. Starting at narrow end seal well. Wrap in waxed paper and chill. Stick a sprig of water cress in each end of the roll just before serving.

TASTY TEASERS

1 slice boiled ham, cut $\frac{1}{8}$ inch thick
 15 large stuffed green olives

1 slice brick cheese, cut $\frac{1}{8}$ inch thick

Trim fat from ham. Cut lean ham and cheese into $\frac{1}{8}$ inch cubes. Cut the olives in halves crosswise. Stick each toothpick through a cube of ham, then through one slice of cheese and half an olive. To set, stick toothpicks into suitable holder placed on appetizer tray.

STUFFING

MEAT OR FISH IN BREAD SHELL

Use a large or small loaf of bread, depending on the number to be served. A 10-ounce loaf serves 6 generously, possibly 8, depending on appetites. For the small family, only half a loaf may suffice. A slice about $\frac{1}{2}$ inch thick is cut from the top of the loaf to make a cover; then the crumbs are scooped from the inside, leaving a shell of a scant inch, or better still, half an inch on the sides and bottom. Soft butter is spread on the inside to be stuffed with the meat, fish, poultry, or vegetable or even fruit-mixture, which is always put warm. After filling, the top edge is brushed over with an egg beaten with a tablespoon of milk, the cover adjusted and this, too, moistened with egg and milk. The loaf is placed on a generously greased baking sheet and baked in a hot oven for 30 minutes or until attractively golden brown. This loaf may be served hot or cold. If hot, serve with a hot tomato sauce or gravy; if cold, with a green salad and Russian dressing.

CHICKEN PIE AND HORS D'OEUVRES

CHICKEN WITH PRUNES

LAMB PIE

1 kilo lamb shoulder	$\frac{3}{4}$ cup flour
2 tablespoons fat or salad oil	2 medium-sized onions
3 cups boiling water	$\frac{1}{2}$ teaspoon marjoram
1 $\frac{1}{2}$ cups peas	8 carrots, cut into pieces 2 inches long
1 recipe of standard biscuit or standard pastry	2 teaspoons salt

Sauté the meat in oil, onion, salt and vegetables. When meat and vegetables are cooked, transfer to casserole or baking dish. Pour thickened gravy over meat and vegetables. Cover with standard biscuit or pastry dough patted out to $\frac{1}{4}$ inch thick, and bake. For biscuit or a deviled pinwheel topping, use hot oven; for pastry topping, bake for 15 to 20 minutes.

Mashed white or sweet potatoes or Duchesse potato topping may also be used. A quick topping is made by covering pie with dry bread thinly sliced, cut into rounds or other shapes and lightly brushed with melted butter. The potato and bread toppings should be baked in an oven hot enough to brown.

PETITES BOUCHES A LA REINE

4 cups butter	$\frac{4}{5}$ cups flour
Salt to taste	1 cup ice water
1 teaspoon lemon juice	

Sift the flour over a marble table and add salt. Make a hole at the center of the flour, put the ice water with the lemon juice. Knead with the finger tips, without overhandling the dough, so as not to make it at all elastic. This mixing must be done quickly. The dough must stand in a cool place for 15 minutes. Flatten out the dough and place the firm butter in the middle. Fold over the four corners of the dough so that the butter is quite covered.

With the rolling pin, roll out the dough into a long strip. It should be rolled until the butter can just be seen. Do not press heavily with the rolling pin. Use as little flour as possible so as not to destroy the proportion of flour. When the pastry is in an even rectangle, fold it thrice, placing one end on the middle and the other end on the first. The dough is then turned around and once more is rolled with the rolling pin. Once more, fold thrice in opposite direction to the first.

Allow the dough to stand in a cool place for 20 minutes before starting two more turns. Remember that the second turn must be in opposite direction to the first. Allow to stand for 30 minutes again. Make two more turns to make a total of six turns. This is the number of turns necessary for Puff Pastry. The dough is ready for the shells of the pie.

Roll to $\frac{1}{2}$ inch thickness. Cut into desired forms. Make a hole at the center with a small cutter. Bake. Fill with the following filling:

$\frac{1}{2}$ cooked chicken	2 truffles
6 champignons	1 cup cream
1 cup Béchamel sauce	2 egg yolks
$\frac{1}{2}$ kilo cooked ham	Salt, pepper and nutmeg to taste

Cut the chicken, champignons, cooked ham and truffles. Sauté the chicken and the rest in oil. Add salt and pepper, then mix all the other ingredients. Cook for 10 minutes.

3 tablespoons flour	1 cup carrots, cooked and diced
1 recipe of rich biscuit topping	1/4 teaspoon pepper

	Celery

Drain oysters, reserving the liquor. To liquor, add enough milk to measure 1 1/2 cups. Heat butter; add celery and onions. Cook over low heat about 5 minutes. Blend in flour. Slowly add milk and oysters' liquor and cook over low heat, stirring constantly until thick. Add carrots, parsley, oysters and seasoning. Pour into greased casserole. Cover with biscuit topping. VEAL AND HAM PIE

Marinate $\frac{1}{4}$ kilo of veal with a little brandy, salt, pepper and spices.

Sauté the veal in oil and onions with the spices, salt and the brandy used for the marinade. When the meat is tender, fill half of the mold lined with pastry; then add a slice of cooked lean ham of about 2 ounces. On top of the ham, place the piece of veal and another slice of ham. Lastly, fill up the mold with the rest of the filling. Cover this with a thin strip of bacon and a very small piece of thyme and bay leaf. Cover the top of the mold with the pastry. Brush with egg, and make a slit in the center so that steam may escape.

Cook the pie in a hot oven for 40 minutes. The test of its being thoroughly cooked is the juice escaping from the hole in the center.

PIE CRUST

BREAD CRUMB PIE CRUST

$1\frac{1}{2}$ cups bread crumbs	$\frac{1}{2}$ teaspoon salt
$\frac{1}{4}$ cup flour	$\frac{1}{2}$ cup butter

CHEESE PASTRY

2 cups sifted pastry flour	1 cup grated cheese
$\frac{1}{2}$ teaspoon salt	5 to 6 tablespoons water
$\frac{1}{2}$ cup shortening	

Sift together the flour and salt, cut in the shortening as for short pastry, work in the cheese lightly with a fork, then add the water, using only just enough to bind the mixture. Roll out on a lightly floured board. Brush the bottom crust either with melted shortening or a little egg white. Bake in moderate oven.

FLAKY PASTRY — STANDARD PIE CRUST

2 cups sifted pastry flour	$\frac{1}{2}$ cup shortening
$\frac{1}{2}$ teaspoon salt	6 tablespoons water

Sift together the flour and salt; chill the shortening thoroughly, then cut it in quickly and lightly until the mixture resembles peas in size.

There is a knack to this method of mixing the dough which must be handled very quickly because the heat of the hands may melt the shortening. A pastry blender or chopping knife may be used, but hand manipulation seems best. The fat particles are rubbed with the fingers so that they are flattened between layers of flour, rather than being squeezed together. More air is incorporated in this way. The essential thing is to work quickly. See to it that all ingredients are thoroughly chilled. Add the water quickly and chill before rolling out.

POTATO PIE CRUST

1 cup flour	$\frac{2}{3}$ cup mashed potatoes
$\frac{1}{4}$ teaspoon salt	$\frac{1}{4}$ cup shortening
$\frac{1}{2}$ teaspoon sugar

Serve immediately.

Double-Boiler Method: Melt the butter or dripping in upper part of a double-boiler; add egg mixture; cook over simmering, not boiling water, stirring frequently, until eggs are thick and creamy. Serve immediately. (Eggs cooked by this method have a custard-like texture.)

Remove the shells from the eggs and cut each egg into six pieces. Heat fat in a frying pan, and cook the chopped onion with it for a few minutes until yellow, but not brown.  $\frac{1}{4}$ pound dried beef
1 tablespoon grated cheese

6 eggs
2 tablespoons butter or other fat
 $\frac{1}{2}$ to 1 cup grated cheese

1 cup cream
Salt
Cayenne

Spread the bottom of a baking dish with fat. Sprinkle a layer of grated cheese over it and break the eggs on the cheese, being careful not to break the yolks. Pour a little cream over the eggs, then more grated cheese. Season with salt and cayenne, and bake in a slow oven until the eggs are set, but not hard. Serve in the baking dish.

Heap on the toast and make a dent in center of each. Slip yolk into center of white, season and sprinkle liberally with cheese. Bake until cheese is browned and eggs are set. Garnish with paprika and bacon.

OMELETS

Break the eggs into a bowl. Season them and beat just enough to mix them. If the eggs are beaten too much, they will lose their body (this means that they will become liquid, like water instead of remaining rather sticky). Place them in a frying pan which is large enough and which contains just enough of very hot butter or lard to grease the pan. The eggs should be cooked over a hot fire and stirred with a fork, loosening from the sides. Do this until the omelet begins to set. When this happens, do not stir anymore with the fork, but keep the omelet moving in the pan with a continuous shaking. When the omelet appears to be nearly cooked, leave it 1 minute more without shaking the pan, so that the bottom becomes lightly browned. Loosen the edge with the fork and roll it, hit handle of the pan a few times with the palm of the hand to make the omelet slide to the edge of the pan. Transfer omelets on a serving dish and garnish with meat or vegetables.

3 tablespoons butter or lard
 $\frac{1}{2}$ teaspoon salt

6 tablespoons orange juice
1 teaspoon orange rind (grated)
2 tablespoons sugar

Beat eggs until yolks and whites are combined; add seasonings, orange rind and orange juice.

Heat butter or lard in a skillet until moderately hot; add beaten eggs. Cook over low heat, lifting the mixture very gently with a spatula as it cooks at the bottom and tipping the skillet so that the uncooked mixture runs under. Do not stir through the mixture, but cook so that it remains in one large cake.

When the bottom is browned and the mixture is firm throughout, fold in half or roll in jelly-roll fashion. Serve immediately.

Cheese Omelet: Prepare French omelet. Just before folding sprinkle with $\frac{1}{4}$ cup grated cheese.

Combine all ingredients, except vinegar, in the top of a double boiler; cook over hot, not boiling water, stirring constantly until thick. Remove at once from the heat; stir in vinegar or lemon juice. Chill before serving.

FRUIT JUICE DRESSING

1 egg yolk	$\frac{1}{4}$ teaspoon salt
$\frac{1}{4}$ teaspoon dry mustard	1 teaspoon sugar
$\frac{1}{4}$ cup salad or olive oil	$\frac{1}{4}$ cup pineapple juice
$\frac{1}{4}$ cup lemon juice	2 tablespoons orange juice
2 tablespoons maraschino juice	

Beat the egg yolk; add mustard, salt and sugar. Add the oil gradually, beating constantly.

Add fruit juices and beat thoroughly with a rotary beater, or put into screw-top jar and shake until blended. If dressing is made in advance, shake again just before using.

GREEN DRESSING

Color 1 cup of mayonnaise with juices extracted from water cress and parsley, using twice as much parsley as water cress. To obtain the coloring, break the greens in pieces, pound them in a mortar until thoroughly macerated, then squeeze them through a cheese cloth. This method of coloring is preferable to the use of artificial coloring, as it contains all the mineral salts of the green. If desired, add also 2 tablespoons of well-washed capers.

HONEY FRUIT DRESSING

3 ounce-package cream cheese	$\frac{1}{4}$ cup orange juice
1 tablespoon honey	1 tablespoon lemon juice
$\frac{1}{2}$ teaspoon salt	Paprika
1 teaspoon grated orange rind	Cayenne

Soften the cream cheese in a bowl; add salt, honey, and orange rind; blend thoroughly. Add paprika and cayenne to taste.

Add fruit juices gradually and stir until smooth.

OLIVE DRESSING

To 1 cup of mayonnaise add 1 tablespoon of finely chopped black olives, 1 teaspoon each of finely chopped green olives, and parsley. Blend thoroughly.

PIQUANTE DRESSING

To 1 cup of mayonnaise add 1 teaspoon each of finely chopped green olives, sour pickles, well-washed green capers, onion, and chives with a scant teaspoon of prepared mustard. Blend thoroughly.

PINEAPPLE DRESSING

$\frac{1}{4}$ cup sugar	$\frac{1}{4}$ teaspoon salt
1 $\frac{1}{2}$ cups pineapple juice, unsweetened	4 egg yolks, slightly beaten
2 tablespoons cornstarch	$\frac{1}{4}$ cup lemon juice Dash of celery salt

Mix the sugar, cornstarch, celery, and salt in the top of double boiler; stir in the pineapple juice. Cook over boiling water, stirring constantly, until mixture thickens. Cover and cook for 10 minutes, stirring occasionally.

Stir a little of hot mixture into slightly beaten egg yolks; add to remaining hot mixture. Cook over hot water, stirring constantly for 3 minutes; stir in lemon juice; chill.

STRAWBERRY WHIPPED CREAM DRESSING

Fold 1 cup crushed strawberries and 1 to 2 tablespoons confectioners' sugar into whipped-cream dressing.

THOUSAND ISLAND DRESSING

To $\frac{1}{2}$ cup of mayonnaise add 1 tablespoon of chili sauce, and 1 tablespoon each of finely chopped celery, pimiento, green pepper, and 1 tablespoon coarsely chopped hard-boiled egg. Finally, fold in $\frac{1}{2}$ cup of whipped cream.

APPLES

Cubed, in balls, in rings, rolled in paprika, minced parsley or chives.

CARROT CURLS

Slice carrots paper-thin, lengthwise, with a vegetable slicer. Chill in ice water until very crisp and curled.

CELERY CURLS

Cut inner stalks of celery into 3 or 4-inch lengths and with a sharp knife, slit each length in thin strips from the border end to within $\frac{1}{2}$ to 1 inch of the other end. Chill in ice water until the thin fingers spread and curl.

CHEESE

Cubed, rolled into small balls, then rolled in paprika, minced parsley, or finely minced nuts.

CHEESE BALLS

Shape cream cheese or drained cottage cheese into balls; roll lightly in paprika or in finely chopped olives or nuts.

CHERRY POINSETTIAS

Make 6 to 8 cuts in whole maraschino cherries from top almost to stem end; flatten out petals. Use as a garnish for fruit salad or fruit cup.

CUCUMBER CURLS

Pare a cucumber by cutting thinly round and round, as you would pare an apple in a continuous strip. Chill in ice water.

GRAPEFRUIT OR ORANGE BASKET

Across the stem end of a grapefruit or orange, draw two parallel lines, about $\frac{1}{2}$ inch apart, coming almost halfway down the side of the orange. With a small sharp knife cut into the orange along the lines. Then from each side cut in at right angles to meet the end of the cut already made. Lift out the two sections thus freed; the fruit is now shaped like a basket. Fill the basket with any small fruits and a sprig of mint, if desired. Use for individual servings of fruit salad or fruit cup; or use as a container for a fruit salad dressing.

GREEN PEPPER RINGS

Use a firm green pepper of good shape. Slice thinly crosswise and cut all white portions. Chill in ice water to crisp.

HARD-BOILED EGGS

Quartered, chopped, sliced, or sieved, sometimes blended with minced parsley, chives, chopped dill, or capers.

ONION RINGS

Use Bermuda or Spanish onions. Slice thinly crosswise and separate into rings. Chill in ice water until very crisp.

PICKLE FANS

Cut small sweet gherkins in thin slices lengthwise from tip almost to end. Spread slices apart like a fan.

RADISH CHRYSANTHEMUMS

Scrape outside of radishes lightly, leaving a pinkish color. Slice radish from top to bottom as thinly as possible, first in parallel rows then in another row at right angles. Chill in ice water.

RADISH ROSES

Cut off the root with a sharp thin knife; score sections of the skin from the tip toward the stem end; loosen the skin nearly to the stem end so that the sections stand out like petals. Make one row of long petals curl back slightly. Another kind of radish rose is made by cutting paper-thin slices of radish for the petals, then inserting the petals into slits cut in other whole radishes. (A row of 3 slits, at a downward angle, around the radish near the top; then a row of 4 lower. Stagger the slits so the petals will overlap as in roses.) Insert the radish petals in the slits and chill in ice water.

TURNIP DAISIES

Cut a slice of white turnip about 1 inch thick. Cut down through it with a fluted cookie cutter. Slice very fine. Between flutings of each slice cut gashes toward the center to separate petals. Insert a tiny piece of carrot in the center. Chill in ice water to curl the petals slightly.

EASTER CHICK

Start with a shelled hard-boiled egg of the size desired. Cut off lengthwise a thin slice to make a flat base. From another hard-cooked egg take the yolk, mix it and mix with mayonnaise to make it soft and smooth. With a decorating tube filled with this mixture, apply wings and head of chick. Insert a small bit of radish for bill and a strip of pimiento for the comb. With a pointed knife make a small slit at the tail end and insert a celery leaf or a small piece of curled endive. (To curl endive, cut the tip of a single leaf in parallel slits about an inch deep and soak in ice water.) Place the chick in a nest of water cress or shredded lettuce in the center of salad platter, or use for individual salads.

NOODLES

HOW TO MAKE EGG NOODLES

1 egg
1 teaspoon salt

$\frac{1}{2}$ egg shell cold water
1 cup flour

Break the egg into a cup, add the half egg shell of water and the salt and mix lightly. Sift 2/3 cup of the flour into a bowl, make a hollow in the center and pour in the egg mixture. Stir with a knife in one direction, adding flour until the dough is so stiff that stirring is difficult. Turn onto a floured board and knead until smooth and elastic. Then roll out as thin as possible, turning the dough about to prevent its sticking to the board. Flour the board lightly and let the dough stand $\frac{1}{2}$ hour to dry. If a cutter is available, run it evenly across the dough and shake the noodle lengths apart. If no cutter is at hand, cut the dough into halves, roll each side like a jelly roll, then slice thin or wide as desired. Shake the slices apart. Let the noodles dry.

To cook, drop the noodles into boiling soup or stew, and boil for 20 minutes. Or drop them, few at a time, into hot fat and quickly fry them until brown and crisp, then drain on soft crumpled paper. Noodles are very good in soups made from turkey or chicken carcass.

HOW TO MAKE A BASKET FROM NOODLE PASTE

The bottom is first cut, about $\frac{3}{4}$ to 1 inch thick, from stale bread. The shape may be round or oval. For the ribs of the basket, pieces of large macaroni (all evenly cut) are stuck into the base. These are spaced at regular intervals, and put in such a way that they lean outwards. Use always an uneven number: 11-13-15, etc., according to the size of the basket. This makes the body of the basket. The wicker work is done with fresh noodles about $1\frac{1}{2}$ inches wide and as long as possible. They are taken one by one and interwoven, passing outside one spoke, and then inside the next one, and so on. Half-cooked spaghetti can be used also for the wicker work.

This basket is then fried in deep hot lard until golden in color.

Next day rinse the watermelon rind with fresh cold water, drain, pat dry in a cloth and chop fine. Drain the vegetable mixture, pressing with the hands to extract all the liquid. Now combine the watermelon rind and vegetables with the sugar, vinegar, spices and seasonings. Cook gently until thick, about 1 hour. Turn into sterilized jars and seal.

1 pimiento, cut into thin strips	1 tablespoon salt

Combine vinegar, salt and sugar in a saucepan. Add mint leaves and heat gently for $\frac{1}{2}$ hour. Add onions and pimento, and if necessary add more vinegar to cover the onions. Chill until onions are crisp before serving. (Mint extract and green food coloring may be substituted for the mint.)

TOMATO KETCHUP

Select fully ripe and fleshy tomatoes. Wash them thoroughly and cut in halves crosswise; remove the seeds; strain the juice from the seeds and set aside. Cut into small pieces, add the juice and boil until very soft. Strain through coarse *sinamay* to extract the pulp of the tomatoes.

1 cup tomato pulp
 $\frac{1}{2}$ cup sugar
 $\frac{1}{4}$ cup vinegar
 2 teaspoons salt

$\frac{1}{8}$ teaspoon of the following
spices:

White pepper, cinnamon, allspice
and mustard, wrapped in a
small piece of cloth.

Mix all the ingredients. Boil in a saucepan (enameled or porcelain) until thick to the consistency of a sauce. Remove the bag of spices. Pack while boiling hot in sterilized bottles and seal hermetically with a cork and sealing wax in preserving jars. Run a stainless knife inside the jar to remove air bubbles. Half-seal and sterilize in water bath 25 minutes and five minutes in the pressure cooker.

CANTALOUE PICKLES

Small cantaloupes
 2 pounds sugar
 2 ounces whole cloves

3 ounces stick cinnamon
 1 ounce whole allspice
 Vinegar

Select cantaloupes which are not too ripe, pare and cut into large cubes. Cover with mild vinegar and let stand 24 hours. Pour the vinegar, then prepare syrup allowing the amounts of sugar and spices specified to each quart of fresh vinegar. Boil until thick, skim and simmer the melons in this syrup for 2 minutes. Lift out with a perforated skimmer and pack in sterilized jars. Boil the syrup again until thickened (the moisture from the melons will have thinned it somewhat), pour on the packed fruits in the jar and seal.

CRISP MIXED PICKLES

1 kilo small onions
 1 small cauliflower
 2 small young cucumber
 1 cup sugar

1 small bay leaf
 1 teaspoon salt
 1 cup vinegar

Pare the onions, the cauliflower and cucumber; cut into small pieces. Place in brine solution (1 part salt and 4 parts water) for 24 hours. Wash and pour boiling water over them. Drain. Pack in sterilized jars. Boil together sugar, bay leaf, salt and vinegar. Pour to the pack mixture and seal completely.

GREEN TOMATO PICKLES

Green, firm tomatoes, cut into
halves crosswise
 1 cup native vinegar

2 cups water
 1 cup salt

Select green, firm tomatoes. Cut into halves crosswise. Remove seeds. Arrange tomatoes in a glass, earthenware, enamel or porcelain container. Pour brine solution (2 cups water and 1 cup salt) enough to cover tomatoes. Place weights (small clean stones or broken pieces of plates will serve the purpose) to prevent the tomatoes from floating. Let stand for 2 weeks, adding 2 tablespoons salt each day for the first three days. Wipe mold as it may appear on top with a wet cloth daily to avoid spoilage.

After two weeks wash tomatoes in several changes of water. Pack in preserving jars and pour the vinegar prepared as follows:

1 cup native vinegar (at least
 4% acidity)

1 cup sugar

Boil vinegar and sugar together and strain through a piece of cloth. Pour over tomatoes. Seal completely.

PAPAYA PICKLES

Grate the papaya. Put $\frac{1}{2}$ cup salt and press until most of the juice is extracted. Wash off salt and juice by using a clean cloth to squeeze it dry. Pour vinegar. Do the same with the rest of the vegetables. Let it stay overnight in vinegar. Next day squeeze off the vinegar and pack attractively in jars. Make syrup out of vinegar, sugar and salt. Pour over packed mixture. Remove all air bubbles and seal completely.

PICKLED ONIONS

Onions for pickling should be small. Blanch in boiling water. Remove the roots with a sharp knife and loosen the skin which readily slips free, leaving the onion perfectly peeled.

The prepared onions are packed into jars and covered with a pickle solution made as follows:

1 cup white vinegar
 $\frac{1}{2}$ cup sugar
 2 cups water

1 teaspoon of mixed whole
 pickling spices
 2 tablespoons salt

The spices are tied loosely in a muslin bag. The sugar is dissolved in the water and vinegar mixture. The spice bag is placed in the syrup and simmered in covered vessel for 40 minutes. The hot pickle solution is poured over the packed onions. Seal the jar partially and process in water bath for 30 minutes.

SWEET MIXED PICKLES

$\frac{3}{4}$ kilo green tomatoes, chopped
 $\frac{3}{4}$ kilo cabbage, chopped coarsely
 $\frac{3}{4}$ kilo tiny onions, peeled
 $\frac{3}{4}$ kilo green peppers, chopped
 $\frac{3}{4}$ kilo cucumbers, chopped

$\frac{3}{4}$ cup salt
 3 cups sugar
 $\frac{3}{4}$ kilo dry mustard
 5 pints vinegar, heated

Combine the prepared vegetables, sprinkle with salt and let it stand overnight. In the morning drain very thoroughly. Combine in a saucepan the sugar and mustard; add a little of the vinegar, mixing smoothly, then add the remaining vinegar and bring to boiling point, stirring constantly. Cook until the syrup thickens, add the prepared vegetables and heat thoroughly. Turn into sterilized jars and seal.

Remove the spice bag, pack into sterilized jars and seal.

MISCELLANEOUS

CHEESE STRAWS

3 cups flour
3 teaspoons baking powder
1 teaspoon salt

1 cup grated cheese
 $\frac{2}{3}$ cup milk
1 cup butter

Sift flour, measure and sift with baking powder and salt. Mix cheese with flour, then cut in butter using 2 spatulas until the mixture resembles a coarse meal. Add milk and mix well. Transfer to a floured board, knead lightly and roll $\frac{1}{3}$ inch thick. Cut into strips, twist a little, then place on a greased cookie sheet and bake in hot oven.

CROUSTADES

Remove all crusts from a loaf bread, preferably a sandwich loaf. Cut bread into $1\frac{1}{2}$ to 2-inch slices. Hollow out center, leaving a wall and bottom about $\frac{1}{2}$ inch thick. To do this neatly, use a very thin sharp knife; first cut down into each slice to make a horizontal slit through one wall, about $\frac{1}{2}$ inch from the bottom and sides, and carefully cut across, until the center is loose.

Brush with butter. Toast in a moderate oven until lightly browned. If desired, dip top in diluted egg white, slightly beaten, then in finely chopped parsley, water cress or mint.

Fill with creamed meat, fish or vegetables or with scrambled eggs; serve immediately. If not used at once, reheat to crisp before filling.

FRENCH TOAST

1 or 2 eggs, slightly beaten
6 slices stale bread

$\frac{1}{2}$ cup milk
 $\frac{1}{4}$ teaspoon salt

Combine slightly beaten egg with milk and salt. Cut each slice of bread in half. Dip in egg-milk mixture and sauté in butter or other fat until browned in absorbent paper.

For breakfast, serve hot with jam, jelly, syrup or honey. For luncheon or supper, serve hot with creamed fish, meat or vegetables.

TOAST BASKET

Remove all crusts, except the bottom one, from a loaf of bread. Hollow out center, leaving a well and bottom about $\frac{3}{4}$ inch thick. Proceed as directed for crostades.

TOAST CUPS

Remove crust from thin slices of very soft bread; spread with melted butter. Press buttered side into muffin pans. Toast in a moderate oven until lightly browned.

Fill and serve as directed for crostades, or fill with a spoonful of jam or jelly to serve at tea time.

TABLE SETTING FOR BREAKFAST

TABLE SETTING FOR TEA PARTY

BREAD

BOSTON BROWN BREAD

1 cup flour	1 level teaspoon salt
1 cup cornmeal	1/4 cup sugar
1 cup Graham flour	1 1/2 cups sour milk
2 level teaspoons soda	2/3 cup molasses
1 level teaspoon baking powder	

Mix and sift the flour, cornmeal, soda, baking powder, salt and sugar. Add the Graham flour, sour milk and molasses. Beat for 2 minutes. Fill greased molds half-full. Cover tightly and steam for 3 hours.

BREAD CRESCENTS

1/2 cup butter	1/2 cup lukewarm water
1/2 cup sugar	6 beaten eggs
3 cups scalded milk	2 teaspoons salt
1 yeast cake	Flour
4 cups flour	Butter for kneading

Cream butter and sugar, add to the lukewarm milk; soften the yeast in lukewarm water and add to the first mixture, then add the beaten eggs, salt and then the flour to make a soft dough. Knead thoroughly, brush over with butter and set aside in a place free from draft. Let it stand until very light. Roll about $\frac{1}{4}$ inch thick, cut into 5-inch square; cut this equally into triangles. Brush with softened butter and roll beginning from the wide end. Roll firmly and lightly, and shape as a half-moon by bringing both ends around. Place on a floured sheet, cover and let rise until double in size. Bake in moderate oven.

BRIOCHE

1 yeast cake	1/2 teaspoon salt
1/2 cup lukewarm water	2 tablespoons sugar
1 teaspoon sugar	6 or more eggs
4 cups sifted flour	1 cup milk
1/2 pound sweet butter	

Soften the yeast in the lukewarm water with 1 teaspoon of sugar. Add just enough sifted flour to make a very soft dough — one which can easily be formed into a ball. When it is thoroughly but lightly mixed, place this ball in a bowl partly filled with lukewarm water, cover and set in a warm place free from drafts, to rise. Within an hour the ball should have risen to the surface of the water and be light and buoyant. Put the remainder of the flour into a large bowl with the ball. Add half the butter, the salt, remaining sugar and 2 un-beaten eggs. Mix and knead to a smooth velvety dough, using as much milk as may be needed. Work in the remainder of the butter with 2 more eggs and repeat the mixing and kneading. When smooth and no longer sticky, juggle with it in the approved French manner, throwing it in the air and banging it on a slab or board until it becomes as smooth as marble. Add 2 more eggs and mix and beat again. Repeat this beating. Knead long and well and then set in a greased bowl. Cover and allow the brioche to rise to double its original bulk. When very light, beat the dough down again and place it in a refrigerator to stand overnight.

To bake the brioche, mold enough of the dough into a ball to half-fill a muffin pan and then make a criss-cross incision in the top of the ball and gently insert a small ball of the same dough for the head or crown of the brioche. Place in greased muffin tin. Set in a warm place to double in size, and bake it in a moderate oven until it is brown and shiny.

BUTTERSCOTCH PECAN ROLLS

$\frac{1}{2}$ yeast cake	$\frac{1}{4}$ teaspoons salt
$\frac{1}{2}$ cup lukewarm water	4 cups sifted flour
$\frac{1}{4}$ cup granulated sugar	$\frac{1}{4}$ cup melted shortening
$\frac{1}{4}$ cup shortening	$\frac{1}{4}$ cup butter
1 egg	1 cup brown sugar
1 cup milk, scalded or cooled	1 cup pecans, chopped

Soften the yeast in the water, adding about $\frac{1}{2}$ teaspoon of the granulated sugar. Cream the shortening, add the remaining granulated sugar, beat egg and the milk, then the yeast. Add the flour, sifted with the salt, using enough to make a dough stiff enough to knead. Turn onto a floured board and knead for 10 to 15 minutes, or until the dough is smooth and elastic. Place in greased bowl, brush over with melted shortening, cover, and let rise for about hours in a warm place until doubled in bulk. Turn onto a lightly floured board, knead slightly, and roll out thinly into a rectangular shape, then with the softened butter, sprinkle generously with brown sugar, then with the chopped pecans. Roll up like a jelly roll, cut into 1 to $1\frac{1}{2}$ -inch slices, and place slices flat in well-greased muffin pans. Put on top $\frac{1}{2}$ teaspoon of butter, 2 teaspoons of brown sugar, and a few pieces of nuts. Press down the slices of dough to make the nuts stick. Cover and let stand about 4 hours in a warm place until double in bulk, then bake in a moderate oven about 20 minutes. As soon as baked, turn immediately bottom side up. Spread over any remaining syrup.

FRUIT SANDWICH BREAD

2 cups flour	$\frac{1}{2}$ cup chopped seeded dates
1 level teaspoon salt	$\frac{1}{2}$ cup chopped figs

1 cup seeded chopped raisins	

Mix and sift the flour, salt, baking powder and sugar. Add the raisins, dates, figs, melted lard and milk. Mix well, then pour into a greased loaf-cake pan. Let stand for 15 minutes. Bake in a moderate oven for 40 minutes. After a day, make into thin sandwiches to serve with salads.

Add the melted butter and salt, then gradually stir in 3 cups of flour and beat until smooth. Add the remaining flour, reserving some to place on the board. Knead dough on floured board until smooth and elastic and until all the flour is worked in. Place it in greased bowl, cover, and set it aside in warm place for about 2 hours, or until well-risen. Mold it in two loaves, place them in well-greased bread pans, filling half-full. Make a slight incision down center of each loaf. Cover, and let rise 1 hour or more. Bake in moderately hot oven from 45 to 60 minutes. (For milk bread, substitute 2 cups of milk for the water plus $\frac{1}{4}$ cup water.)

¾ cup milk
2 teaspoons grated lemon rind
¾ teaspoon nutmeg
½ teaspoon salt

Sprinkle yeast over warm water. Let stand for 5 minutes. Bring milk to a boil and cool. Add yeast, one-half of the flour and 2 tablespoons of the sugar; beat until smooth. Cover and let rise in a warm place about $\frac{1}{2}$ hour. Stir in the beaten eggs, lemon rind, shortening and remaining flour sifted with remaining sugar, nutmeg and salt. Beat for 10 to 15 minutes by hand or 4 to 5 minutes by electric mixer or until bubbles appear on the surface. Cover and let rise about 1 hour, turn out on board and roll out 1 inch thick; cut with doughnut cutter; cover and let rise about 1 hour or until double in bulk.

¼ ounce yeast
Salt and milk for mixing

Dissolve the yeast with a little tepid milk, and pour it into the middle of the flour. Add the sugar, eggs, salt, and the necessary amount of milk. Add the melted butter last. Keep for 2 hours in gentle heat so that the dough will rise to double its volume before making the waffles.

Before cooking, try a little of the dough. Bake one or two small rounds in a very hot oven on a buttered floured baking sheet. To $\frac{1}{2}$ cup of grated mixed raw vegetables (carrots, onion, green pepper, celery, etc.), add $\frac{1}{2}$ cup of ground ham and moisten with mayonnaise, then season with salt and pepper.

JARDINIERE SANDWICH

Remove crusts from bread; cut loaf lengthwise in slices $1\frac{1}{2}$ inches thick. With a round cooky cutter $1\frac{1}{2}$ inches in diameter, cut each slice into cylinder. Hollow out each cylinder; fill with a mixture of cream cheese and crushed pine-apple, chopped maraschino cherries, chopped nuts, chopped chives or any savory mixture. Top with a sprig of parsley, water cress or mint.

OPEN SANDWICH

Spread small rounds of bread with creamed butter, then with filling, and decorate with nut meat, bit of cherry, and a slice of stuffed olive.

PINWHEEL SANDWICH

Remove all crust, except the bottom, from a fresh fine-textured loaf of bread. This remains on the loaf to give firmness while cutting. Heat a very sharp knife and cut bread lengthwise in slices $\frac{1}{8}$ to $\frac{1}{4}$ inch thick, using a sawing motion. Spread with a smooth, soft sandwich filling.

At one end lay small sweet pickles or a few stuffed olives. Beginning at this end, roll bread as for jelly roll. Spread a little soft butter on the last lap of bread to make it stick, which it will do when chilled. For variety, in place of pickles or olives lay alternating strips of green pepper and pimiento crosswise, 1 inch apart, over entire slice of bread.

Wrap each roll in wax paper and place in a refrigerator. When ready to serve, slice about $\frac{1}{4}$ inch thick.

RIBBON SANDWICH

Remove the crust from each slice of bread. Spread butter, then mayonnaise. Arrange strips of ham, cheese, pimiento and dill pickles. Put another slice of bread and proceed with the same arrangement but alternating the colors of each filling, until four slices of bread are used; press a weight, then cut crosswise into 3 slices.

ROLLED SANDWICHES

Spread thin slices of very fresh bread with pimiento or snappy cheese softened with mayonnaise (or other filling such as tinted cream cheese). Roll, fasten with toothpicks and chill. These sandwiches may be brushed with melted butter and toasted.

RADISH SANDWICH

Slice red radishes into little circles. Sprinkle salt over them. Spread the bread with nut butter. Cover with radishes.

ROQUEFORT CHEESE SANDWICH

Combine $\frac{1}{2}$ cup of Roquefort cheese, $\frac{1}{2}$ cup cheese and 1 teaspoon of Worcestershire sauce. Season highly with pepper, lightly with salt. Any preferred bread may be used.

SHRIMP SANDWICH

Spread the bread with butter. Chop the shrimps, and put on the bread. The bread should be in small rectangles. (The shrimp may be replaced by crab meat.)

4 eggs
1 yeast cake
1 rind of lemon, grated
6 to 7 cups flour

Prepare and knead as usual, then put into floured loaf pans, let rise and bake. Cool and take out the soft crumbs of the whole bread, leaving the crust.

Meat of chicken

Pork loin

Cut the chicken meat and loin into fine cubes. Soak in equal parts of soy sauce and vinegar.

In a frying pan with lard, sauté two cloves garlic, macerated, and sliced onions. Add the chicken and loin mixture. Cook until tender and golden brown. Remove from fire and place in proper container; then add caramelized sugar made of 1 cup sugar and $\frac{1}{3}$ cup water.

TOMATO SANDWICH

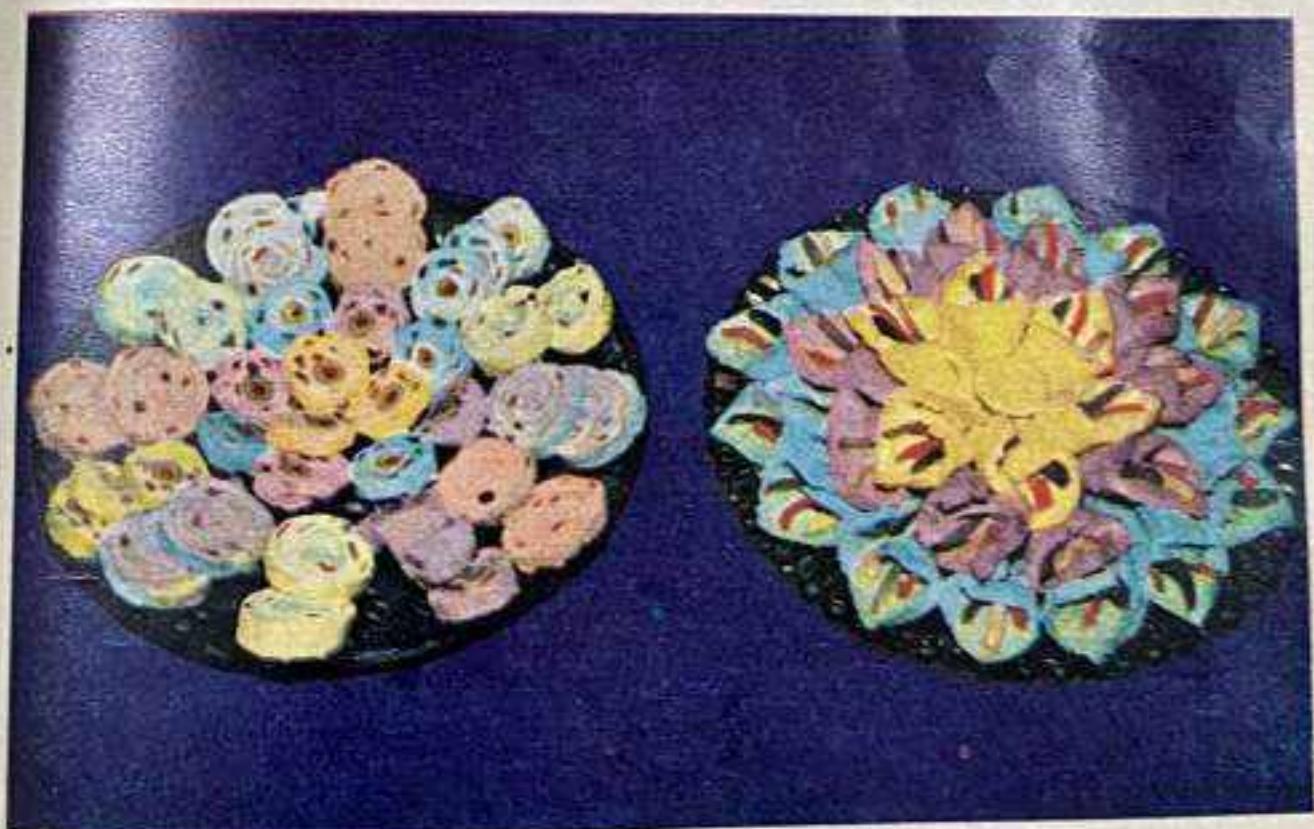

Spread slices of bread with horse-radish butter. Slice the tomatoes, peel and remove the insides. Place on the bread, which should be of a triangular shape. Sliced cheese may be added to vary the color, taste and texture.

WEDDING SANDWICH ROLLS

Wrap closely in a towel wrung out of cold water bread as it is taken from the oven; cover with several thicknesses of dry cloth and set aside about 4 hours; then cut away the crust, and with a thin, sharp knife cut the loaf or loaves in slices as thin as possible and spread with butter, and if desired, thin shavings of meat or potted meat or chopped nut. Roll the slices very closely and pile on a serving dish.

Cool slightly and add dissolved gelatin. When the gelatin mixture begins to thicken, fold in the stiffly whipped milk and vanilla. Pour into a mold. (To make a more elaborate dessert, add 1 cup blanched almonds to the mixture and line the mold with lady fingers.)

Pour slowly over the beaten egg yolks and cook, stirring constantly, until thick. Remove from fire, cool a little and add the vanilla. When partly cold but not set, fold in gently the stiffly beaten egg whites. Turn into one large or several individual previously wet molds and chill.

Made in this manner the mixture will separate and form a jelly at the bottom with custard on the top. If this separation is not desired, allow the custard to cool thoroughly before folding in the egg whites. Unmold and serve with whipped cream or any preferred fruit.

Make a custard with the coffee, sugar, salt and egg yolks. Strain while still hot, then add the gelatin which has been softened in cold water and stir until this is dissolved. Chill, then fold in the whipped cream and vanilla and freeze in refrigerator.

CUSTARD**APPLE SAUCE CUSTARD**

Divide 2 cups of apple sauce among 6 custard cups or glasses, and chill. $\frac{3}{4}$ teaspoon of gelatin softened in 1 tablespoon of cold water to 1 cup of beaten custard as soon as it comes from the fire. Stir thoroughly until the gelatin is dissolved; cool and when beginning to set, pour over the apple sauce. Chill and serve, topped with whipped cream flavored with vanilla.

BAKED CUSTARD

3 eggs
1 teaspoon vanilla
Dash of salt

2 tablespoons sugar
2 cups milk, scalded

Beat the eggs with the sugar and salt, then add the milk slowly, stirring constantly and mixing until the sugar is completely dissolved. Add the vanilla and turn the custard into slightly buttered custard cups or one larger baking dish. Place in a pan of warm water and bake in a moderate oven 25 to 30 minutes. If baked in one dish, allow a little longer baking period. Test by running a knife blade into the custard; if it comes out perfectly clean, not milky, the custard is done. Never allow the water in the surrounding pan to boil as this would make a honey-combed custard.

If the baked custard is to be served in the cup, and it is necessary that the top be browned, beat the eggs very well, instead of just slightly. This forms a foam that rises to the surface of the mold after the custard is poured in, and the foam browns beautifully during baking. This applies also to custard pie, as a pale-faced pie is not tempting nor appetizing. But when the eggs are well-beaten, the custard, while just as creamy and smooth to the taste, is likely to contain air cells and not quite as finely grained as a custard made from eggs beaten just enough to mix the whites and the yolks.

BOILED SOFT CUSTARD

2 eggs, slightly beaten
 $\frac{1}{2}$ teaspoon vanilla
Dash of salt

1 tablespoon sugar
1 cup milk, scalded

Combine the eggs, sugar and salt in a bowl. Add the scalded milk slowly, beating and stirring constantly. Return to the upper part of the double boiler and cook over water which should never reach the boiling point, stirring constantly until the custard thickens and shows faint traces in the wake of the spoon and covers the spoon itself. Cool slightly and add the vanilla.

When egg yolks alone are used in making a custard, remember that the thickening will be more rapid than with whole eggs. It is necessary, therefore, to watch the custard constantly.

Any desired flavoring may be used in a custard. It may be extract, fresh grated fruit rind, or a sprinkling of spice such as cinnamon or nutmeg.

CRUSTED BAKED CUSTARD

Add $\frac{1}{2}$ cup finely chopped nuts to the custard mixture before placing in the oven. Bake as directed.

FROZEN STRAWBERRY CUSTARD

Wash, hull, and drain the berries, then crush. Boil the sugar, water and salt until mixture spins a fine thread. Pour this syrup slowly, in a steady stream, over the stiffly beaten egg white, beating constantly until the mixture stands in peaks. Fold in the vanilla-flavored whipped cream and the crushed berries. Turn into a refrigerator tray and freeze. Cut into small squares for serving.

If preferred, the fluff may be frozen in small paper cups. Set in a refrigerator tray to freeze. Garnish, if desired, with large, whole, fresh berries and a green leaf.

ORANGE CUSTARD

$\frac{3}{4}$ cup sugar	2 eggs
3 tablespoons cornstarch	$\frac{1}{2}$ teaspoon almond extract

Blend thoroughly, add the milk, then cook in the upper part of the double boiler for 20 minutes, stirring constantly until the mixture thickens. Halve the oranges crosswise and carefully remove the pulp, discarding all white connecting fibers. Place in a shallow baking dish and bake. Pack in hot sterilized jar and seal completely.

ORANGE MARMALADE

12 thin-skinned oranges
2 quarts water

3 lemons
Sugar

Wash and slice the oranges and lemons as thin as possible. Add the water and let stand overnight. Next day cook the mixture slowly until tender (2 to $2\frac{1}{2}$ hours.) Measure the mixture, add an equal measure of sugar, and cook until the jelling point is reached. Turn into sterilized jars and seal.

QUICK ORANGE MARMALADE

2 juicy, seedless oranges
1 quart water
5 cups sugar

1 lemon
 $2\frac{1}{2}$ tablespoons lemon juice

Lightly grate outer surface of oranges so that some bitterness may be out. Boil oranges briskly for 2 minutes in large kettle using plenty of water. Soak several minutes in ice-cold water. Then cut into small-sized chunks and place in large pot. Mince the rinds into lemon juice. Heat to a boil and stir in sugar until dissolved. Simmer for at least 2 hours.

Now test mixture for jelling quality by determining if it will "sheet," that is, form at least 2 drops of jelly which will hang on edge of spoon. If liquid will not sheet at the first test, continue simmering for several minutes longer and test again. Carefully remove any scum which may have collected on the surface of the mixture. Seal at once in hot, sterilized jelly glasses (1-pint sized), allowing $\frac{1}{4}$ inch at top for paraffin. Seal at once and store in cool, dry place.

SANTOL MARMALADE

10 santols
2 cups water

1 kilo sugar

Select thick-skinned santols; blanch until soft. When done, put in cold water. Peel thinly and remove the seeds. Cut the pulp into thin strips.

Mix pulp, seeds, sugar, and water. Let it boil until syrup thickens. Stir to prevent scorching or burning. The mixture is done when the seeds and peels are transparent in appearance. Pack in sterilized jar and seal tightly.

JAM

BANANA (SABA) JAM

4 cups ripe bananas (*saba*)
2 cups sugar

1 cup water

Boil the bananas. Mash them well, and set aside. Boil the sugar and the water, stirring constantly until it forms a soft, firm ball when tested in water. Add the mashed bananas. Continue stirring until it thickens. Form into balls or any desired shape. Roll in fine sugar.

GUAVA JAM

Use ripe fruits only. Peel thinly. Cut crosswise and scoop off the seeds. Mash the pulp and pass through a coarse *sinamay*. Do the same with the seeds. Combine the two strained mixtures. To 1 cup of the mixture, add 1 cup sugar. Boil until thick; pack in well-sterilized jars and seal tightly.

MANGO JAM

7 to 8 ripe mangoes

1 kilo sugar

Peel the ripe fruits; scrape the pulp lightly with a paring knife. For every cup of the pulp, add 1 cup sugar. Cook until thick and clear. Stir while boiling to prevent scorching or burning. Transfer while hot to a well-sterilized jar and seal it tightly.

MELON JAM

Peel and dice the flesh of a ripe melon; it should not be too ripe. Let stand for 24 hours in $\frac{1}{2}$ pound sugar for each pound of melon. Drain the resulting juice and cook to thicken. Add the melon cubes, and continue boiling with the rind from an orange, until a kind of firm marmalade is obtained. Flavor with vanilla.

ORANGE JAM

Choose 12 oranges of good quality. Prick them all around with a fork going right to the skin. Soak the oranges in cold water for 3 days, changing the water twice a day. Be careful that the oranges are always covered with water. On the third day, the oranges are boiled whole in a large volume of water, starting with cold water. The cooking takes a long time. The oranges are cooked when a piece of straw can easily penetrate the skins. They are then put in cold water to drain overnight, to remove the bitterness. Drain well the next day. Cut the oranges into 4 or 6 "quarters" according to size. Remove the pits, and weigh the fruit. Add the same weight of preserving sugar. Moisten with the juice of 6 fresh oranges, add the cooked oranges, and boil together until the syrup sets. Skim well while boiling.

PAPAYA JAM

4 cups ripe papaya, mashed
4 cups sugar

2 cups water
3 spoonfuls *kalamansi* juice

Boil sugar and water to a thick syrup. Add *kalamansi* juice and mashed papaya, stirring continuously until it thickens.

PAPAYA-KALAMANSI JAM

1 cup mashed ripe papaya
 $\frac{1}{2}$ cup sugar

$\frac{1}{4}$ cup chopped kalamansi
 peel and pulp

Peel the ripe papaya and wash. Open and remove all seeds; mash pulp and measure; to each cup of papaya, add $\frac{1}{4}$ cup chopped kalamansi peel and pulp (seeds removed) and cook, constantly stirring until it is thick. If it is to be kept long, pack in sterilized jars while boiling hot and seal air-tight; or sterilize (quart jars—30 minutes; pint jars—25 minutes) in boiling water.

PAPAYA-PINEAPPLE JAM

1 cup chopped pineapple
 1 cup mashed ripe papaya

1 $\frac{1}{2}$ cups sugar

Mix all the ingredients together in a copper vat and cook, stirring constantly when thick to avoid scorching. Cook until it reaches the right consistency of a jam. Pack in preserving jar and sterilize (quart jars—30 minutes; Pint jars—25 minutes in boiling water or 10 lbs., 10 minutes in a pressure cooker).

PINEAPPLE JAM

1 regular ripe pineapple
 1 kilo sugar

1 pint jar

Peel and remove the eyes. Wash it very well and cut into small pieces. Chop it with a food chopper. Squeeze the juice and chop again until very fine. When done, mix juice and pulp. To every cup of pulp, add one cup sugar. Cook until thick and clear and transfer it while hot into a well-sterilized jar. Seal the jar tightly.

STRAWBERRY JAM

1 quart strawberries

3 cups sugar

Place strawberries in a kettle over heat. Crush as they heat. When strawberries boil, add sugar and cook quickly until thick (not over 20 minutes), stirring frequently to prevent burning. Pour into clean hot jars and seal.

TAMARIND JAM

1 cup tamarind

1 cup sugar

Select ripe tamarind. Soak overnight in plenty of water. Drain and put the soaked tamarind in a piece of *sinamay* and squeeze until all the pulp has come out. To each cup of tamarind, add one cup of sugar and boil until thick. Pack in well-sterilized jars and seal tightly.

TOMATO JAM

Remove the seeds from the tomatoes, and then slice them thin. Boil for 5 to 6 minutes. Drain and pass through a fine sieve. Weigh the purée. Use an equal weight of sugar and fruit. Boil the sugar until thick with a little vanilla; add the purée; and stir constantly to prevent burning. Boil for a long time, because this jam does not set by itself. If a little currant or apple juice is added, the jam is better and sets more easily.

DIET THERAPY

ANEMIA

Anemic persons should be given a protein-rich diet. Liver, milk, eggs, leguminous seeds, cereals, butter, cream and coconut creams, are encouraged to the limit of toleration and digestion.

In severe cases, it is suggested that predigested foods be given . . . such as peptonized milk, milk jelly, and milk punch. Starches in the form of arrowroot, enriched rice flour, or cassava flour cooked in milk can be given between meals. Medical advice on supportive therapy should be sought.

A par-excellence food for this disease is homemade pemmican.

HOMEMADE PEMMICAN

$\frac{1}{4}$ lb. lean beef put twice through a meat chopper	$\frac{1}{4}$ lb. marrow from the leg or shin bone of an ox
---	--

Chop the marrow with a silver knife and remove the fiber. Mix the beef and marrow thoroughly with a half spoonful of salt, set, stand at once in a cold place, then broil.

Serve it with whole wheat bread of some easily digested, simply cooked green vegetables, sliced oranges, a few white grapes, or make it into sandwiches.

NOTE: In cases of pernicious anemia, induce the patient, if possible, to eat this whole amount in 2 or 3 servings.

(This is a good preparation also for a tubercular patient.)

CHICKEN LIVERS WITH BACON

Clean and cut livers in pieces. Wrap a thin slice of bacon around each piece. Fasten with small skewers. Put in broiler over dripping pan and bake in hot oven (425°F) until bacon is crisp, turning once.

These can also be cooked on open hot charcoals.

BROILED LIVER

Wipe with damp cloth and remove the thin outside skin and veins. If beef liver is tough, parboil 5 minutes if sliced, 20 minutes if whole.

Prepare slices of liver $\frac{1}{2}$ inch thick. Sprinkle with salt and pepper, place in greased wire broiler, and broil 5 minutes, turning often. Spread with little butter and serve hot.

CREAMED LIVER SOUP

$\frac{3}{4}$ cup chopped liver	4 tablespoons flour
2 cups milk	2 tablespoons butter

Make white sauce and add chopped liver. Heat well, season and serve.

ALBUMINIZED MILK

Put the white of one egg and a cup of milk into a quart fruit jar. Cover the top and shake it very well for a few minutes. Strain and serve at once.

ARROWROOT MILK

Put 2 cups of milk in a double boiler, add 2 teaspoons of arrowroot moistened in a little cold water, stir until the mixture thickens, cover the vessel, and cook ten minutes. Two teaspoons of sugar and 4 tablespoons of sherry may be added if admissible.

ARROWROOT JELLY (2 servings)

Put 1 cup of milk in a double boiler, add 2 teaspoons of arrowroot moistened in 2 teaspoons of cold milk. Stir well until mixture begins to thicken, cover the boiler and cook 15 minutes. Turn into small individual molds and stand aside to cool. This should be shaky and jelly, not stiff. Serve with powdered sugar and cream.

LECHE FLAN

8 egg yolks
1 cup sugar

2 cups fresh milk
1 lemon rind or vanilla

Scald the milk in a double boiler for 15 minutes. Beat the egg yolks with the sugar, milk and flavoring. Pour into mold lined with caramelized sugar. Place this in a bigger pan half-filled with water and bake until mixture becomes firm. Cool before removing from mold.

Note: To caramelize sugar, dissolve 1 cup brown refined sugar in $\frac{1}{4}$ cup water and cook over moderate heat until the sugar browns or caramelizes.

COCONUT LECHE FLAN

2 cups thick coconut milk
6 egg yolks
4 egg whites

1 cup sugar, refined
1 cup brown sugar
 $\frac{1}{4}$ cup water
1 lemon rind

Dissolve brown sugar in $\frac{1}{4}$ cup water and cook over moderate heat until the sugar browns or caramelizes. Line evenly a suitable mold with $\frac{3}{4}$ of the caramelized syrup and set aside.

Stir the milk into the remaining $\frac{1}{4}$ of the caramelized syrup. Place over low heat and stir continuously until all caramel is dissolved.

Mix egg yolks, and slightly beaten whites and beat lightly to mix thoroughly. Add sugar and lemon rind. Then add coconut milk with caramelized syrup and mix well. Strain with cheese cloth and pour into the mold. Cook slowly in a pan of hot water without allowing the water to boil. After $1\frac{1}{2}$ hours cooking, cover mold with a sheet and over this, place a few pieces of live charcoal to brown top of custard or slip under broiler in oven just long enough to brown.

Cool and unmold before serving.

A S T H M A

Overeating, hurrying through our meals, and too many parties aid in the development of asthma and other manifestations of allergy.

Aside from improper eating habits, another poor practice is seeking medical advice when the disease is already at its chronic stage — unmindful that medical care plus correct diet can help cure a disease. Remember that each succeeding attack makes cure more difficult.

When our stomach is constantly at work, its digestive powers flag. Consequently, unnatural fermentations occur and the toxins (or poisons) formed are circulated through our system. One will notice that an asthmatic person is highly sensitive to change of weather and readily catches cold.

The prime rule in asthma is: Never overeat and "nibble" between meals. Sometimes attacks happen because of flatulence (having gas in the stomach or intestine) and indigestion. Avoid foods that habitually induce the attack.

Try to eat foods that are not cooked in fat. Eat starchy foods sparingly. Green vegetables should be eaten crisp — perhaps cooked in a little salted water, or served raw as a salad with a little vinegar-oil dressing.

Needless to say, fresh air and pure clean water are necessary companions in this health program. Consult your family physician for other health measures.

ALMONDS

The high price demanded for almonds places them from a food standpoint, among luxuries, appetizers and flavorings.

They have, however, a decidedly medicinal value. Some physicians recommend an emulsion of almonds where fatty food is called for and olive oil is not well-borne.

Almond milk is very beneficial in cases of stomach trouble. Six almonds, blanched and eaten raw, will frequently relieve an acute attack of indigestion, provided they are properly and thoroughly masticated.

Almonds are digesters, so they are served salted and roasted at the end of the meals. The enzymes are killed by roasting and they become indigestible. Serve them raw.

NOTE: Good for asthma, stomach trouble, chronic indigestion.

GLUTTEN BREAD

Put 4 cups of flour in a bowl, add sufficient water to make a very hard dough. Knead this dough until thoroughly mixed, then put it through a sieve, under a small stream of water and knead until the dough is nearly free from starch. When the water is clear, take the remaining gluey mass to the bread board; add a teaspoon of baking powder, mix; break off a piece about the size of a *kalamansi* and roll it out on your palm into a stick about four inches long and the size of a lead pencil. Put these on oiled paper and bake in a very slow oven until crisp.

If these are to be served warm, bake them in a quick oven, which gives an entirely different effect.

Purchase a center steak from any white-fleshed fish, cut off enough for one feeding. Fish must not be used the second day. Wash it quickly, wipe it dry, turn and brown the other; then hold it at least 6 inches above the fire; turn it once or twice, broiling it 10 minutes in all. Transfer it to a heated platter, spread over with little butter, put over a few drops of lemon juice and serve at once.

POTATO PUREE

Break a well-baked potato into halves and scoop out the mealy portion; add 4 tablespoons of good cream and a spoonful of salt; beat it quickly with a silver fork and serve on a heated plate.

APPENDICITIS

Did you know that appendicitis is more common among persons who are troubled with habitual constipation or persons who sit in unnatural positions or stoop over as tailors, seamstresses or bookkeepers?

The most important step towards recovery from appendicitis is to correct the irregularities of the stomach.

(1) Give up one meal a day, preferably, breakfast. Take coffee without sugar, or orange juice, or half a glass of apple juice. However, if breakfast is eaten, the food must be light and easily digested. Prepared cereals such as corn flakes, farina, pablum (oatmeal), cream of wheat, etc. may be taken.

(2) Luncheons should be composed largely of cream soups or milk preparations.

(3) For supper, give boiled rice, broiled beef, chicken or white-fleshed fish, with little vegetable in salad form.

(4) Garlic is a desirable stimulant in this disease, so rub the plate in which to make the French dressing with a clove of garlic.

(5) Induce the patient to stop eating while the food tastes good. The food must be thoroughly masticated.

(6) Do not give desserts.

GRILLED MILKFISH

1 large milkfish
1 onion
4 tomatoes, medium-sized
1 tablespoon soy sauce

2 segments garlic, macerated
 $\frac{1}{4}$ cup white native vinegar

Chop the onions and tomatoes until fine. Season with salt and pepper. Stuff the fish; wrap it with banana leaves and tie with a string. Broil it in an oven for an hour and a half. When done, serve with sauce of macerated garlic, soy sauce and native vinegar.

Return to double boiler and cook until mixture coats spoon, stirring constantly. Remove from heat, add egg whites, beaten until stiff, and vanilla. Mold, chill, and serve with cream, plain or whipped.

BERIBERI

Rice, our staple cereal, is usually consumed in the white milled form. This form of white rice diet has been associated with deficiency diseases, notably beriberi. We all know that beriberi is the number two killer — close behind tuberculosis. Unlike tuberculosis, beriberi is not caused by germs but a deficiency of vitamins, especially Vitamin B or thiamine. A total of about 25,000 Filipinos die each year from this dreadful disease. Infant death rate are usually two-thirds of the total beriberi mortality.

It was because of this high recorded beriberi death rate that the Philippines was selected as the first field test of the rice enrichment program.

A practical approach to the beriberi problem has been found in rice enrichment, a measure which gives white rice dietary advantage over brown, undermilled, home-pounded and parboiled rice with special emphasis to its thiamine and niacin.

Enriched rice is the same polished rice you eat everyday to which extra food values in the form of vitamins and minerals have been added. This is done to replace what has been lost or removed during the milling.

In comparison, premix rice is a highly fortified rice grain; any ordinary polished rice is used as base. This rice base is treated with a concentrated vitamin solution consisting of thiamine and niacin.

Let us not confuse enriched rice with premix rice. Enriched rice is the result of mixing proportionally ordinary milled rice with premix or vitaminized rice. Through a device called the "feeder" attached to the rice mill, enriched rice is obtained when we use the following ratio: 1 part premix to 200 parts ordinary milled rice. We may do the very same thing at our homes, use one tablespoon of premix rice to one ganta ordinary milled rice.

Dr. Juan Salcedo, Jr. and his associates demonstrated experimentally in Batan, in the biggest field trials on human beings in the history of medical science, that rice enrichment is an effective answer to our beriberi problem.

3 cups enriched malagkit
5 cups coconut milk

1 cup sugar
1 small coconut, grated

GINATAN RICE WITH CORN

$\frac{1}{2}$ cup enriched malagkit rice

8 cups coconut milk
2 cups sugar
1 teaspoon salt

Boil the washed malagkit rice in coconut milk until half done. Add the corn, sugar and salt. Continue cooking, stirring occasionally until rice and corn are cooked. Before serving, top the dish with the coconut cream. Or if it is desired, the cream can also be added to the mixture a minute or two before removing from fire.

C A N C E R

For people suffering from cancer, a vegetable diet, with such foods as eggs and milk, is recommended. Fruit juices as well as fruits are excellent foods.

In arranging the menu of a cancerous person, the white meat of chicken could be given 2 to 3 times a week. Avoid pork and all red meats. Exclude from the diet all fried foods and all dishes cooked long beforehand.

It's a strict diet . . . but if there is to be a cure, there is no alternative but to follow! Of course, we limit this discussion to the diet. There are surgical and physical as well as some chemotherapeutic measures against cancer.

CODDLED EGG

Drop one or two eggs into a quart of boiling water in a kettle or a saucepan with a lid; cover and stand on a table away from the fire, six minutes, or if the eggs are to be served very soft, five minutes. Serve in a hot cup. If cooked correctly the white will be congealed but soft, while yolks will be well-cooked. (Best method of cooking eggs for the sick).

KOUMYS

Heat 2 quarts of milk to 100° F., boil together 2 tablespoons sugar and 2 tablespoons water; add this to the milk; dissolve a third of a compressed yeast cake in 2 tablespoons of milk, add it to the milk and pour at once in bottles. Cork and tie down the corks in the same way as for champagne, stand the bottle upright in a temperature of 65° F. overnight; next morning place them carefully on their sides in a cold place, and after 24 hours they are ready for use. Open the bottle with a champagne top.

STUFFED POTATO

Cut a baked potato into halves, scoop out the center, mash it with a silver fork, add 4 or 5 tablespoonfuls of hot milk and a saltspoonful of salt. Beat until light, and fold in carefully the well-beaten white of one egg. Fill the "shells" but do not pat the mixture down to make it heavy. Brush the top lightly with milk, and bake in a moderate oven until golden brown. Serve on a dainty paper doily.

This is a nice way to serve a baked potato, both to children and invalids. The second baking makes it more easily digested.

For variety use sweet potato.

2 eggs	1 tablespoon butter
2 tablespoons milk or cream	Salt and pepper to taste

Use a heavy pan of generous size. If used for omelets alone, it does not need washing after each cooking. Wipe carefully with a dry cloth.

Beat eggs slightly, just enough to blend yolks and whites, and add milk and seasonings. Put butter in hot omelet pan; when melted, turn in mixture; as it cooks, lift with spatula, letting uncooked part run underneath until the whole is of creamy consistency. Increase heat that it may brown quickly underneath. Fold and turn on hot platter.

CHRONIC CONSTIPATION

Nothing is more uncomfortable or more irritating than a feeling of being constipated. Several doctors have said that the mind has a powerful influence over this disease.

The following "Don'ts" might help one select a suitable diet for a constipated person:

1. Don't eat an early breakfast, especially in bed.
2. Don't eat stewed fruits (especially *saba* cooked in syrup) at the end of the meals.
3. Don't drink at the beginning of a meal.
4. Don't preface your meal with soup.
5. Don't eat rich sauces.
6. Don't use mayonnaise dressing on vegetables; use French dressing.
7. Don't eat when not hungry.
8. Don't eat a great variety of foods.
9. Don't eat large quantities of fruits with meals; they cause discomfort and interfere with the action of the heart.

"Do" however:

1. Bathe or sponge every morning. This helps the circulation of the blood.
2. Drink immediately a glass of cool water, not ice water. After half an hour, drink a cup of clear coffee.
3. A glass or two of cool water can be taken between breakfast and luncheon.
4. If hungry a little later, eat fruit or a soft boiled egg.
5. Masticate your food thoroughly.
6. Drink at the end of each meal.
7. Take fruits with cereals and vegetables with meat.
8. At bedtime, eat four or five tablespoons of scraped carrots, apples, or a piece of peanut brittle or a small bag of freshly popped corn.
9. Before going to bed, drink a glass of cool water.

PEANUT BRITTLE

2 cups sugar	A few grains of salt
1 cup roasted peanuts, chopped	

Melt sugar in heavy pan, stirring constantly until it is a thin syrup. Add nuts and salt. Stir until well-coated and spread thinly in greased pans. When nearly cold, mark in squares.

STUFFED KAMOTE
(Sweet Potatoes)

2 large sweet potatoes	$\frac{1}{4}$ cup chopped pecans
2 tablespoons butter	2 egg whites
4 tablespoons hot cream	1 teaspoon salt

Scrub the sweet potatoes and bake until soft. Cut in halves lengthwise, remove the contents. Be careful not to break the skins. Pass the sweet potato through the ricer, add the butter, cream, salt and the chopped pecans. Beat the mixture until fluffy and add to it the stiffly beaten egg whites. Mix well, and return the mixture to their cases. Bake about ten minutes.

ALMOND WAFERS

Mix one cup of almond paste with one and a half cups of warm water, and stir in sufficient bran to make a hard dough; this will take nearly 4 cups. Roll it into very thin sheets, cut it into wafers (one-inch wide and two-inches long) and bake in a moderate oven to a golden brown. The bran must be clean, free from flavor.

(Good for cases of chronic constipation).

D I A B E T E S

Diabetes is a primarily hormonal deficiency disease characterized by a voracious appetite, an increase of sugar in the blood and the excretion of sugar and sometimes acetone bodies in the urine. Although the complete information of the exact initial cause is still unknown, heredity closely associated with obesity in adults and overweight in children are outstanding factors of this disease.

Unlike previous years, the modern diabetic does not need a long, long list of diabetic recipes. Everyday foods may be seasoned according to taste provided no sugar is used.

The standard diet of a diabetic includes:

1. Green vegetables, not starchy ones.
2. A choice of fresh fruits for dessert or canned fruit of the water-packed brands.
3. Milk, sufficient for its calcium values.
4. Eggs, prepared and served with bacon or cheese (not fried or hard-boiled)
5. A choice of meat, fish or fowl liver or shellfish.
6. A variety of breads (not sweetened)
7. Cereals
8. Butter, cream, oil, or mayonnaise
9. Commercial ice cream once or twice a week is permissible.
10. Clear weak tea and coffee.
11. Use saccharin or sucaryl instead of sugar.

HOW TO COOK CHICKEN IN A PAPER BAG

Heat the oven at least 10 minutes before putting a chicken or bird; 300°F is just about right. Dust the chicken with salt, brush it with little melted butter, put it in a paper bag, fold over the end of the bag and fasten it; place the bag on a grate in a pan, and at once in the oven. Cook 35 minutes to a pound. Slide the chicken from the bag to a serving dish, and pour over the sauce.

This perhaps is one of the best ways of cooking chicken for the sick. There are very good logical, scientific reasons for using a bag or oiled paper for oven cooking of meats.

This method of cooking retains all the nutritious qualities, and the meat does not shrink or become dry, and is never greasy.

CREAM SAUCE A LA GENEROSA

Put four tablespoons of cream in a China cup, stand it in a little pan of hot water and stir it until it is palatably hot, and add $\frac{1}{4}$ teaspoon of salt. Use at once.

This sauce can be used in diabetic cases.

CHICKEN WITH PAPAYA AND SILI LEAVES

$\frac{1}{4}$ onion
 Green papaya, cut up
 Sili leaves
 A piece of ginger
 Salt or patis

Fry the garlic, ginger, onion, then add the chicken. Mix well and when partly done, add enough water to cook the chicken until tender. Add the papaya and cook until it is soft but not mushy. Season with salt or patis. Add sili leaves before removing from fire.

GENEROSA PUDDING

Grate one coconut, pour over it two cups of boiling water, stir for about 2 or 3 minutes, let it stand until cool and squeeze the milk. Strain. Put the coconut milk thus made into a double-boiler, add the beaten yolks of two eggs, cook just a minute until slightly thickened. Take from the fire and turn into the serving dish. Beat the whites of eggs into a stiff froth, heap them over the top of the pudding and heat it in the oven a minute to brown.

This may be given as a change to diabetic patients.

ALMOND CAKE

$\frac{3}{4}$ pound almond
2 tablespoons butter
 $\frac{1}{4}$ teaspoon salt

2 egg yolks
2 egg whites (well-beaten)

Blanch the almond, put them through the meat grinder twice. Add the butter and mix thoroughly, add the salt and stir in the yolks of eggs. When this is thoroughly mixed, fold in the well-beaten whites of the eggs. Bake in lightly greased gem pans with about 2 tablespoons in each pan.

Note: To take the place of bread for the diabetic patient.

COCONUT CREAM SAUCE

Stand coconut milk in a cold place overnight. In the morning take off the cream, put it in a bowl and beat with an egg beater until light and frothy, heap it in a glass dish, and stand in the ice to harden. Use on gelatin or fruit puddings in cases of diabetes or tuberculosis.

Beat the white of eggs and add it to the mixture. Sweeten it with sugar.

Mix, strain and keep in cold place or in the refrigerator. Add to each glassful, at serving time, a tablespoon of *blackberry brandy*. Give it slowly through a straw.

Note: This is a very desirable hot-weather-food for old persons who are inclined to diarrhea. The use of straw stimulates the gastric juices and aids in digestion.

YAM PUFF

 $\frac{1}{4}$ cup butter
2 well-beaten eggs

$\frac{1}{2}$ cup sugar
2 teaspoons baking powder
1 teaspoon salt

Peel potatoes and boil until soft. Mash and add the remaining ingredients. Beat well and put in buttered casserole. Dot with butter and bake about $\frac{1}{2}$ hour or more until brown.

ECZEMA

One might say that eczema is a sort of first cousin to urticaria. As in all skin diseases, a correct diet is of cardinal importance in the cure of eczema. The stomach must be kept in good condition.

If one is anemic, a glass of milk with beaten egg white should be taken daily. Meat should be avoided but instead take plenty of milk and eggs. For this disease thorough mastication is essential.

Drink plenty of pure soft water between meals. Do keep the skin fresh and in trim condition with daily baths of soft water and neutral soap.

ORANGE MILK SHERBET

1 tablespoon unflavored gelatin $\frac{1}{2}$ cup milk

Soften gelatin in milk 5 minutes in saucepan. Place pan in low heat until gelatin dissolves, stirring constantly. Remove from heat and let stand.

 $\frac{1}{4}$ cup lemon juice $\frac{1}{4}$ teaspoon salt
 $\frac{1}{2}$ cup sugar

Combine orange juice, lemon juice, sugar, corn syrup and salt. Stir until the sugar is dissolved.

$1\frac{1}{2}$ cups milk Yellow food coloring
 2 teaspoons grated orange rind

Add milk, orange rind and gelatin mixture. Blend thoroughly. Add food coloring as desired.

Pour into 2 ice trays; place on top shelf or bottom of freezer. Set temperature control at the coldest point; freeze to mush (about 1 hour). Place in chilled bowl; beat smoothly. Return to ice trays; freeze until firm about 45 to 60 minutes.

POTATO SOUFFLE

Stir the well-beaten white of one egg into a mashed potato; heap it into an individual casserole or ramekin dish and bake in the oven until golden brown.

DIET IN FEVERS

How fortunate we are to live in this modern age. Over a century ago, most fever patients were starved because of the foolish phrase "starve a fever." We may quickly add that most of these patients died not only from starvation but because they were also bled.

In all fevers the processes of metabolism are increased — the patient needs more rather than less food. The protein is lost in greater proportions than the fats. The appetite is weak, the digestive organs lack the natural activity, and thirst is intense.

To alleviate the great loss of protein, large quantities of milk and milk preparations should be given.

Avoid solid foods. They are slow to digest, frequently decompose in the intestines and provoke serious new diseases.

As diet is of prime importance in fever cases, do not be guided by patient's appetite. The gnawing of a sick stomach does not always mean hunger. A little food taken often is the motto here.

All chilled fruit juices, fruit ades or just plain cool water help immediately in putting fever down.

ASS' MILK

2 tablespoons gelatin
1 cup cold water

1 cup boiling enriched rice water
2 cups cow's milk

Cover the gelatin with a cup of cold water, soaking it for about ten minutes. Add to it a cup of boiling rice water, remove from the fire and strain. When cold, add the cow's milk. Keep in the refrigerator until needed.

Note: This preparation is recommended for fever cases when temperature of the patient must be brought down. Rice water can be substituted with barley water.

MILK JELLY

Cover 2 teaspoons of gelatin with 1 cup of cold milk. Soak for half an hour. Heat it in double boiler, or stand bowl over hot water and stir until gelatin is dissolved.

Strain into 2 fancy individual molds, and stand at once on the ice.

Note: In case of fever, this must be served plain, without sugar or cream. Convalescing patients may dust it with powdered sugar and eat it with plain or whipped cream.

GELATIN WATER

Pare the yellow rind from one lemon and put it in a good-sized pitcher; add the sliced lemon, $\frac{1}{4}$ cup sugar, 2 cups boiling water, one tablespoon gelatin (that has been soaked in $\frac{1}{4}$ cup of cold water for a half hour.). Cover the pitcher and put in the refrigerator after it has been strained.

ARROZ CALDO WITH CHICKEN

$1\frac{1}{2}$ cups enriched rice
1 small chicken
1 inch cube ginger
2 segments garlic
2 stalks green onion

1 small onion
2 tablespoons lard
3 tablespoons *patis* or soy sauce
6 cups water

Dress and cut the chicken into convenient sizes, wash and clean well. Pare and slice the ginger thin. Sauté the garlic, ginger and onion. Add the chicken and flavor with 3 tablespoons *patis* or soy sauce. Cover, allow to simmer a few minutes. Add rice and water, stirring all ingredients together to avoid sticking to the sides of the pan. Cook over low heat for 20 minutes or until chicken and rice are cooked. Add chopped green onion stalks before serving.

CHICKEN WITH VERMICELLI

1 small chicken	2 tablespoons lard
1 small onion	1 tablespoon <i>patis</i>
1 small bunch green onions	Salt to taste
1 package vermicelli	Garlic

Boil the chicken until tender. Set the broth aside. Remove all the bones from the boiled chicken and cut meat into pieces.

Sauté the garlic, then the onion until brown. Add the chicken and *patis*. Simmer for a while. Add chicken broth and let boil. Add vermicelli. Season with salt. Garnish with green onions.

DISEASES OF THE HEART

It is a known fact among dieticians that the most common causes of heart troubles are irregular mode of life, an unbalanced diet or badly cooked foods.

The road to relief is through a straight and narrow diet. Foods must be well-selected, simply cooked and easily digested. Eating between meals or munching through several "meriendas" is strictly prohibited. The stomach must never be overloaded or palpitation will occur. Even a glassful of water before digestion is completed will cause flatulence and produce paroxysm.

Health rules include:

1. Do not eat too much during meals.
2. Never eat eggs, milk, and meat in the same meal.
3. Do not take soup at the beginning of the meal.
4. Avoid all rich sauces, salads, cooked fats, sweet dishes and over-starchy dishes.
5. Do not eat indigestible foods, coarse vegetables, dense raw fruits such as meats, pork, veal, clams, pink-fleshed fish, effervescent drinks, strong coffee and tea.

This may sound too severe to follow, but the *heart* is indeed a delicate organ and it is the life of our whole system.

SOPA DE ASPARAGUS CON PICADILLO DE GALLINA

Prepare good chicken broth, season with salt and pepper. Add asparagus stock, thicken with cornstarch diluted in little water. Add asparagus tips cut into 1-inch pieces, reserving the tops for garnishing. Bring to a boil. Drop in the finely chopped chicken breast meat which has been mixed with 2 egg whites. Garnish with small strips of ham and asparagus tops and serve hot.

GULAMAN WITH FRUITS

Boil 2 cups of water and put a small bunch of *gulaman*. Add 2 cups of sugar, a bottle of tru-orange or any flavor of soft drinks desired. Add diced fruits and season and let stand in cool place to harden.

INTESTINAL INDIGESTION

We all love to go to parties. We often forget ourselves and indulge in over-eating starchy foods and sweets. Before we know it, a doctor has been summoned and we are found to have intestinal indigestion.

This disease is found among people who eat large quantities of bakery products (bread, cakes, pies, pastries, etc.) and at the same time drink two or three cups of tea or coffee. This form of indigestion is very common. The secretion of the intestines becomes dull and consequently, gases are formed.

The first advice would be to cut down at once the quantity of food to be taken, especially the fats, sugars and starches. A small quantity of food taken at frequent intervals will bring about a cure more rapidly than larger meals at one interval. Do not drink during the meal.

JUNKET

Into a small, clean bowl, put one teaspoon of Pepsencia (Essence of Pepsin) and add 1 cup of fresh cool milk. Stir gently to mix thoroughly.

Place the bowl in a dish or pan and pour into the larger dish or pan boiling water sufficient to come to the level of the mixture.

Let the bowl stand in the hot water for two minutes, then remove and let it stand until the milk is firmly jellied. When it is ready for use, serve just as it is or with sugar, grated nutmeg, etc.

To keep the junket, put it in refrigerator or in any cold place with ice.

If preferred, the milk and Pepsencia, as soon as they have been thoroughly mixed in the bowl, may be divided into small cups or individual molds; and the rest of the directions, followed as above. Junkets in small cups are more attractive to the patients.

RICE PUDDING

Put one tablespoon of unwashed enriched rice into 2 cups of milk and add a half tablespoon of sugar. When the sugar is dissolved turn into a small baking dish and bake one hour, stirring down the crust every ten minutes. This pudding must be like thick cream — not stiff enough to require a sauce.

GELATINIZED MILK

Wash $\frac{1}{4}$ of a box of vegetable gelatin in cold water, drain and add 2 cups of cold milk. Soak in a cold place for one hour. Put this in a double boiler, stir carefully until the gelatin is dissolved, remove from the fire, and when cold, add 4 cups of fresh sweet milk and put in the refrigerator.

LIVER TROUBLES

It is amazing to note how many disorders and diseases can be caused by the overindulgence of the palate. Overeating of rich or badly-cooked foods and over-drinking will frequently overtax both the digestive tract and liver.

Luckily, of all body organs the liver responds most quickly to a correct diet. Immediately cut off fried foods, sweets, entrees, sauces, liquors, pork, sea foods, tea, coffee, chocolate, for one year — then note the amazing change.

Give plenty of water between meals.

Fruits should take the place of desserts.

Fruit juices given once or twice a day is also advisable.

Green vegetables everyday are a must.

Masticate all foods well because mastication aids digestion which in turn aids in the activity of the liver.

Give the heaviest meal in the middle of the day, then have light supper.

SOFT-BOILED LUNCHEON EGGS

Boil 2 eggs for 5 minutes and plunge into cold water. Remove the shells, leaving the eggs whole. Serve them in purée.

Peas are made as follows:

Boil the peas until they are tender. Drain and force through a strainer. Moisten with water in which they have been cooked. Season with butter and salt. Reheat but take care that purée does not burn. It should be thicker than soup but thinner than mashed potatoes.

FRENCH POACHED EGGS

Fill a deep saucepan 2/3 full of boiling water, put it over a quick fire where it will boil rapidly. Take a wooden spoon or paddle, stir rapidly around the edge until the water forms a whirlpool with a hole in the center. Break 2 fresh eggs into 2 separate saucers, drop one in the center of the water, keep up the whirling, drop in the second, keep the spoon going around the edge until the eggs are coagulated on the outside. Lift them carefully with a skimmer and put at once into an egg cup. Note: This is a very good way of preparing eggs when eggs are recommended for the nourishment of the patient.

AMPALAYA WITH EGGS

1½ cups *ampalaya*
2 to 4 tablespoons lard
¼ cup minced onion
½ cup sliced tomatoes

1 teaspoon minced garlic
1 cup of water
2 eggs, beaten slightly

Wash the *ampalaya*, cut lengthwise and remove the seeds and soft pulp. Cut the *ampalaya* crosswise into thin slices. Sauté the garlic and onions in 2 tablespoons lard. Add the tomatoes and water, cover and cook for 2 minutes. Add the sliced *ampalaya*, cover and cook for 3 minutes. Season with salt and pepper. Add the beaten eggs, spreading all over the vegetables. Cook over a slow fire until the eggs are slightly firm. Add lard if necessary to keep the eggs from sticking to the pan. Avoid stirring for this squeezes more of the bitter flavor of the vegetables and makes the dish unpalatable.

PNEUMONIA

Pneumonia is an inflammation of the lungs. It, therefore, calls for light stomach-digested foods devoid of fats.

Since fever and weak heart action accompany this sickness, do not give solid food. Be careful not to overfeed the patient. The weak heart must not be overtaxed.

One can give nourishing skimmed milk shaken with egg whites or plain milk containing not over 3% fat.

ALMOND MILK (FOR PNEUMONIA)

Blanch and grind $\frac{1}{4}$ lb. of almonds. Put butter into a pitcher and add a half pint of cold water gradually stirring all the while. Continue stirring for five minutes. Strain through double cheesecloth and set aside until palatably cold.

When almond milk is to be served two or three times a day, it is advisable to make the desired quantity in the morning, and keep it in a covered bottle on ice. Four ounces is given in each feeding.

ALMONDS AND MILK

Follow the recipe of almond milk and substitute milk for water. After straining, add ten grains of salt to each individual quantity.

BEEF PANADA

1 pound lean beef, chopped fine	1 sliced onion
1 $\frac{1}{2}$ cups water	1 bay leaf
$\frac{1}{2}$ teaspoon salt	1 tablespoon celery seed

Mix the water and the beef, and soak for two hours in a cold place; then add all the seasonings. Stand the saucepan in another pan of boiling water and boil continuously for two hours. Strain in coarse sieve, rubbing through as much meat as possible. Serve hot with toasted bread.

RHEUMATISM

Rheumatism like typhoons is temperamental — usually coming with sudden changes of the weather. A rheumatic patient must therefore be protected against the sudden change. See that the patient is warmly dressed and that he lives in open air. These, coupled with correct food, will greatly help cure rheumatism.

A rheumatic patient should not eat too much pork or beef. Eggs, milk and chicken may be given instead. Milk or cream soup must take the place of meat soups. Green vegetables and fruits should be added to the diet. White-fleshed fish are far desirable than pink-fleshed ones.

Avoid all rich, highly seasoned nitrogenous foods, sauces, entrees and sweets.

Strange as it may seem, water is the keynote to recovery. Between meals a patient may drink one to two glasses of soft, cool but not ice water.

Remove the pulp from one orange or half a grapefruit. Arrange the flesh neatly on a glass of individual dessert, pour over coconut cream and serve. (Without sugar, this can be taken by a diabetic patient. It is exceedingly good for the rheumatic and gouty, and gives a variety of long-continued diet for an invalid.)

BARLEY

Put 2 cups of boiling water in the upper part of a double boiler, add a teaspoon of salt, and when the water in under vessel is boiling rapidly, sprinkle in one cupful of barley. Allow each grain, if possible, to fall separately. Do not stir it. Cover and boil continuously for one hour. Dip this into the serving dish carefully, without breaking the grains. (Rolled oatmeal and rolled wheat are cooked in the same way.)

EGG SAUCE

Beat the yolk of one egg until creamy. Add slowly $\frac{1}{2}$ cup of boiling water, stirring all the while. Stand the cup in a saucepan of hot water, and when the sauce has the consistency of mayonnaise, remove it from the fire, add a teaspoon of butter, a teaspoon of salt and a dash of lemon juice.

(Note: Serve as dressing on green vegetables. This is good for rheumatic patients.)

CHICKEN AND FRUIT SALAD

1 cup white meat of chicken	10 large grapes
$\frac{1}{2}$ orange	10 salted almonds
$\frac{1}{2}$ apple	$\frac{1}{2}$ banana
	$\frac{1}{2}$ cup mayonnaise

Cut white meat of chicken in small pieces. Remove seeds from orange sections and cut in half. Cut grapes in halves, removing seeds. Split almonds. Slice banana. Dice apples. Add the mayonnaise and mix all the ingredients slowly but thoroughly. Serve chilled on lettuce leaf.

DISEASES OF THE STOMACH

A few Golden Rules for ordinary Dyspepsia are the following:

1. Masticate everything well.
2. Do not drink when the mouth is full.
3. Do not soften hard foods, as toasts or bread crusts, by dipping them in water, milk, tea or coffee.
4. Never drink tea or coffee at meals. A cup of milk flavored with coffee may be taken in the morning. Weak tea, with lemon and sugar, may be taken between lunch and supper.
5. Leave the table before you feel quite satisfied.
6. Eat food at moderate temperature, never too hot or iced.
7. Rest but do not sleep 30 minutes after each meal.
In all gastric disorders the appetite often flags. This is nature's way of saying "Do not eat too much". Rest the stomach as much as possible.

TOMATO-CRAB SALAD

6 medium-sized tomatoes
2 cups crab meat
 $\frac{1}{4}$ cup chopped almonds
 $\frac{1}{2}$ onion, chopped

1 hard-boiled egg
1 teaspoon lemon juice
Mayonnaise

Blanch the tomatoes and remove the seeds and skin. Chill in the refrigerator. Mix the crab meat, almond and onion. Season with salt, pepper and lemon juice. Add a little of the mayonnaise dressing and stuff the tomatoes. Sprinkle top with chopped hard-boiled eggs and decorate with parsley.

SINIGANG NA TALAKITOK

1 medium-sized *talakitok*
3 medium-sized tomatoes
 $1\frac{1}{2}$ cups enriched rice water

Juice of *kalamansi* and salt to taste
1 bunch of *sigarillas* or string beans or any vegetable desired

Clean fish very well. Boil in about $1\frac{1}{2}$ cups rice water with the tomatoes, salt and *kalamansi* juice. Then add the fish and the vegetables and cook until done. Add enough rice water for the broth. Season to taste.

TUBERCULOSIS

A great many lives can be spared if proper care is immediately given. The cure of tuberculosis depends largely upon rest, fresh pure air, and nutrition.

A patient who diligently follows health rules can be cured at home where perhaps he could get better care than in a poorly managed sanatorium.

The health rules include sleeping in a well-ventilated room and taking large amounts of milk and eggs.

As the dietician's problem in T. B. cases is always to keep up the appetite, she should provide a variety of pleasing ways of serving food. Be careful, however, not to overfeed the patient.

Nourishing ways of serving milk and eggs are called such as eggnog, custards or leche flan. Select the most suitable foods taking into consideration its availability, and the financial limitations of the patient. If eggs and cream are too expensive, substitute them with bacon, meat, stew, lentils or mongo, peanut and bean soup, oatmeal, milk and cereals, and cheaper fruits such as bananas, avocado and the like.

Large quantities of foods are called for, but if the digestion is upset, the whole scheme fails. Avoid too great a variety at a meal.

If indigestion occurs, stop all vegetable foods at once and give modified milk, albumin and milk, or whole wheat bread only.

All drugs should be avoided, except those prescribed by the physician. Cod liver oil should be avoided unless ordered. Depend on coconut creams, milk, and eggs, olive oil, nut soups, nut milks (especially those made from almonds) for your fatty foods. Unlike that for pneumonia, the diet for tuberculous patients calls for nourishing foods rich in cream. A glass of modified milk with a double quantity of cream given at bedtime will lead the patient to an early recovery.

Clean $\frac{1}{4}$ kilo of tenderloin of beef. Take a blunt silver knife and scrape the pulp of the meat fiber. Put that which you have scraped on a porcelain or ordinary china plate. Do not allow it to touch iron or tin. When you have sufficient scraped meat, make it into two small cakes about a half inch thick. Put these in a paper bag or in a piece of oiled paper and cook on a rack in a pan in a very hot oven for ten minutes. When done, place them on a hot plate, dust lightly with light salt and a bit of butter and serve immediately.

ALMOND-MEAT CAKE

Blanch six almonds and grind them fine. Add them to the meat cake. Cook as in meat cake. When done put them on heated plate. Add a few drops of lemon juice with the butter.

AVOCADO-PINEAPPLE SALAD

3 good-sized ripe avocados, sliced	1 cup whipped cream
1 cup diced pineapple	$\frac{1}{4}$ cup chopped almond

Mix avocados and pineapple and a little of the almonds. Whip the cream and fold in mixture. Chill and garnish with chopped almonds.

COCONUT CUSTARD

Grate a coconut, pour over 2 cups boiling water, and stir for 2 or 3 minutes. Let it stand to cool, then strain.

Put the coconut milk in a double boiler, add a teaspoon of cornstarch moistened in a little cold water. Beat the yolks of 2 eggs with a tablespoon of sugar. Add them to the hot coconut milk. Stir until the mixture is as thick as soft custard. Remove from the fire and pour at once into serving dish. Beat the white of eggs to stiff froth, add 2 tablespoons of powdered sugar, and beat until fine and dry. Heap over the pudding, brown in the oven and set aside to cool.

CRAB CROQUETTES

2 cups crab meat	1 cup white sauce
1 teaspoon onion juice	Cracker crumbs or <i>biscacho</i>
Salt and pepper	1 egg, beaten
Chopped parsley	

Chop the crab meat fine and add the seasonings. When well-mixed, add to the white sauce. Mold into croquettes, roll in cracker crumbs, dip in the slightly beaten egg, and then roll in the crumbs again. Fry in deep hot fat until golden brown.

White Sauce

2 tablespoons butter	$1\frac{1}{2}$ cups milk
2 tablespoons flour	$\frac{1}{2}$ teaspoon salt

Melt the butter without browning, add the flour and salt and cook until it is well-blended. Add the milk slowly, stirring all the while to keep from scorching. When the boiling point is reached, remove from fire and beat well, or until creamy.

SHRIMP SAUCE
 (To Be Served with Fish)

ULCER OF THE STOMACH

(Gastric Ulcer)

It is of cardinal importance that we protect the stomach against all sorts of irritations. In this disease "an ounce of prevention is indeed more than a pound of cure". The stomach must be kept empty except at feeding time. The feedings should be sufficiently far apart to give the organ rest between meals.

In severe cases, an exclusive milk diet is best. This can be alternated with almond milk, arrowroot milk, gruel and albuminized milk.

It is often wise to go on a liquid diet until all signs of discomfort are absent. Do not begin with solid foods too soon—oftentimes, serious conditions consequently reappear.

Avoid all fried and highly-seasoned foods, sweets served with acid and coarse foods.

DISEASES OF THE URINARY SYSTEM

It is a known fact that large amounts of protein-rich foods give undue work to the kidneys. The retained poisons influence the composition of the urine. Diseases such as kidney disorders which are caused by a faulty diet can be greatly modified by a correct diet.

For this disease a skimmed milk diet is recommended. The drinking of a large quantity of water is also advantageous. Oftentimes spring water or bottled water from the drug store has great curative powers.

After a cure has been initiated, a simple vegetable diet is recommended. All meats must be given up. Sugars and starches must be limited. Alcoholic and malt liquors are taboo.

Here, one's diet should be limited to fruits, green vegetables, milk and milk preparations.

Salt should be taken sparingly.

BAVARIAN CREAM

KEMPNER'S RICE DIET

Recently the rice diet, originated by Walter Kempner, has been used with favorable results in the treatment of acute and chronic nephritis and hypertension. The diet is monotonous; it must be continued over a long period of time to obtain good results; it is reported to be worthless if modified in any way. The original diet consists only of rice, fruits, fruit juices and sugar, supplemented with vitamins and iron. However, the basic diet may be modified after a time, and beneficial results justify its use.

KARELL MILK DIET (Low Protein, Low Salt, Low Fluid, Low Calorie)

The quantity of fluid to be given must be determined by the physician.

For convalescents, a milk diet is used with increasing amounts of milk or the addition of cereals, bread, sweet butter and fruit. The salt content is usually kept to approximately 2 grams.

It is rarely necessary or desirable to keep up a strict Karell Diet for more than 4 or 5 days. Fruit juices are frequently a pleasing substitute for part of the milk.

URTICARIA

The skin is indeed a delicate and sensitive secretory organ which is so easily affected by habits, diet and exercise. Usually persons who eat indigestible foods or compounds or those who wash down their foods with coffee, or other beverages become bothered with skin eruptions especially in the hands. In the cold weather the skin of the face is red and coarse, and in warm weather, it is greasy.

To correct the condition, raw green vegetables with a little French dressing should be added to the diet. Fresh fruits and fruit juices are also recommended. A person suffering from this should drink plenty of water between meals.

PSYCHOLOGICAL ASPECTS OF FEEDING CHILDREN

Children of today are the men and women of tomorrow, the pillars of society and the strength of the country. Their health and happiness are assets to the community and constitute a great responsibility and challenge to parents who care for them. Intelligent feeding of children demands a knowledge of nutritional values and food needs as gauged by observable symptoms of physical, mental, and social growth. What foods are to be given to a child and at what age are often individual matters dependent upon the child's state of health, his digestive powers, the family's food habits based on customs, traditions or religious beliefs, the family's budget for food and at times upon foods available in the market. With all these in mind, one might wonder how children ever survived the years before the science of nutrition was developed. Fortunately, the necessary structural elements for growth and health are widely distributed in natural foods and despite differences in dietary practices among races or families, the majority of the people tend to include varied foods in their meals which adequately supply the body's food requirements. Moreover, it has also been accepted that foods for children are not judged on calories or vitamins and minerals alone since studies have shown that the child's appetite instinctively seeks a balanced diet unless he has developed prejudices against certain foods and provided he has been trained and offered a reasonable variety of wholesome natural foods. Feeding behaviors of children as reflected in their homes or school activities are often tangible evidences of care and attention or lack of them, with respect to dietary habits which insure maximum growth and development. Generally speaking, more attention should be devoted to the diet in early life than in later years, because the child's needs are proportionately greater, foods suitable for children are strictly limited and the child cannot make an independent choice but is dependent upon the provision and selection of the adults who care for them.

SUGGESTED GUIDE FOR FEEDING CHILDREN

The formative years in a child's development are his first six years of life. Normally, a strong robust body, a pleasant disposition and an alert mind are indices of proper nutrition. How a child develops all these desirable traits of health are often rooted deeply in the early training the child grew up with in food habits and practices. From the time the baby is weaned away from milk or at a time when his age and health warrant it, new foods are gradually introduced in his diet to supplement the indispensable vitamins and minerals in milk. It is obvious that the child's physical growth is accompanied by a relative increase of physical and mental activities which require a proportionate supply of energy and growth-producing foods.

Roughly, adequate planning of balanced meals for children should include the following:

- (1) Milk (in any form) averaging at least 1 quart daily for those between 1-3 years.
- (2) Meats, poultry, fish or cooked legumes daily, $\frac{1}{2}$ tablespoons for a year old baby; 1 serving for pre-school child.
- (3) Egg daily, (an extra egg can be a partial substitute for meat, though it is desirable to have both egg and meat daily).

- (4) Vegetables, leafy, green or yellow ones, twice a day (some of it raw)
 Leafy — 2 teaspoons for a baby
 $\frac{1}{4}$ - $\frac{1}{2}$ cup for pre-school
 Green or yellow — 1 - 2 tablespoons for baby
 $\frac{1}{4}$ - $\frac{1}{2}$ cup for pre-school
 Other vegetables — 3 - 4 tablespoons for baby
 $\frac{1}{2}$ - $\frac{3}{4}$ cup for pre-school
 1 - $1\frac{1}{3}$ cups for early school

- (5) Fruits, 2 to 3 times a day. Fruits and fruit juices considered essential to daily diet should form part of at least one meal. Approximate amount needed:
 8 — 4 tablespoons for baby
 1 — 2 medium-sized fruits for pre-school
 2 medium-sized for early school

- (6) Whole grain cereals or bread, 2 to 3 times daily (preferably enriched)

The following diets are suggested to meet the child's food needs at different ages:

ONE YEAR OLD

Amounts and calories needed at 1 year:

<i>Proteins</i>	<i>Fats</i>	<i>Carbohydrates</i>	
3.5 Gm.	4.0 Gm.	12.0 Gm.	(per kilo of body weight)

The percentage distribution of calories in the diet should approximate: protein—15%; fats—35%; carbohydrates—50%. A diet so constructed furnishes 100 calories per kilo of body weight and may offer the following:

Breakfast:

- 1) Cereal (whole grain or enriched and well-cooked)
- 2) Whole egg

Lunch:

- 1) Vegetable (green or yellow in lumps)
- 2) Potato (or equivalent as macaroni, rice etc.)
- 3) Meat or fish (baked or boiled)
- 4) Fruit
- 5) Milk

Supper:

- 1) Cereal
- 2) Fruit
- 3) Milk

For mid-morning or afternoon snacks, fruit juices, milk or crackers may be given.

TWO YEARS OLD

Breakfast:

- 1) Fruit (orange, stewed prunes or bananas)
- 2) Cereals with milk
- 3) Bread or toast and butter
- 4) Milk

- 6) Milk (in form of desserts, puddings, or gelatine)

Supper:

- 1) Cream or vegetable soup

- 2) Starchy vegetables (potato, macaroni, noodles or rice)
- 3) Vegetables (green or yellow) with butter
- 4) Bread or toast
- 5) Fruit or baked or boiled custard for dessert
- 6) Milk

Supper:

- 1) Egg
- 2) Vegetable dish
- 3) Bread and butter
- 4) Fruit for dessert
- 5) Milk

FOUR TO SIX YEARS OLD

Amount and Calories for This Age Group

<i>Proteins</i>	<i>Fats</i>	<i>Carbohydrates</i>
2.5 Gm.	3.0 Gm.	11.0 Gm.

Note: 1 Gm. protein = 4.1 calories; 1 Gm. fat = 9.3 calories; 1 Gm. carbohydrate = 4.1 calories

The diet of a six-year-old should approximate 85 calories per kilo of body weight.

Basically, the diet for the older child follows the pattern set up for the 3-year-old, but may only be increased in quantity and varied in preparation. However, since the child's stomach is small, and digestion requires energy, it is well to avoid foods that waste space and energy and offer limited nutritional value, such as:

- 1) Foods high in fat content or cooked in fat or oil which digest slowly and do not offer growth factors, as fried foods, pastries, doughnuts, potato chips, fat meats, greasy gravies, mayonnaise, cream and desserts rich in fat or cream.
- 2) Foods high in sugar content that spoil the child's appetite for more nutritive foods, as carbonated drinks, fruits cooked in heavy syrup, rich frosted cakes, candies, griddle cakes, waffles, or French toast.
- 3) Highly seasoned foods which spoil the child's taste for bland milk or eggs, highly spiced meats and sausages, highly seasoned sauces, mustard or pickles.

POPULAR RECIPES FOR CHILDREN

CEREALS

Cereals made from whole grains and those enriched with vitamins are often the first solid foods introduced in the baby's diet, although there are babies who take to fruit more easily. Cooked or uncooked cereals are served with milk, fruit juices, sliced fresh fruits or any combination of them. Too much sugar is usually avoided as it quickly destroys the child's appetite for other foods. Whole grain cereals are more valuable than highly refined ones as they furnish the body with tissue-building protein, blood-building iron, bone-building phosphorus, growth-promoting and health-protecting vitamins B and G and are probably the cheapest source of energy. Well-cooked and strained cereals are introduced as early as 3-4 months or as soon as the child's health and digestive processes permit. At 9 months to 1 year, the coarser varieties are given and by 2 years, the child is ready to take dry and ready-to-serve cereals.

The following table is a helpful guide in introducing cereals:

CEREAL AND CEREAL SUBSTITUTES

Age	Cereal Foods Given
3-4 months	Strained pre-cooked cereals (thin consistency)
4-5 months	Strained cereals, whole grain types added
6-8 months	Potato, mashed, baked or boiled — thin consistency
9 months - 1 year	Cereals, coarse variety like oatmeal; mashed potato
1 year	Toast and milk or white sauce
1½ years	Crackers or Melba toast; sandwiches
2 years	Cereals, dry, ready to eat; macaroni with tomato sauce; bread, spiced or nut bread
3 years	Macaroni with white sauce and cheese
4 years	Hot bread, waffles, pan cakes, French toast
5 years	Potato, whole with butter and salt

TEMPTING WAYS TO SERVE CEREALS

Breakfast cereals need not always be the same familiar dish as children easily tire of them. Both cooked and ready-to-serve cereals lend themselves to variations thus making them attractive to children's fastidious appetites. The following are some tempting ways to serve cereals:

- 1) Cook cereals in milk or fruit juice instead of water.
- 2) Chopped or dried figs or raisins may be added to the cereal in the process of cooking — $\frac{1}{4}$ to $\frac{1}{2}$ cup dried fruit to 1 cup cereal.
- 3) Garnish the cereals with fresh, cooked, or canned fruit before serving.
- 4) Sprinkle some flaked ready-to-serve-cereals over the bowl of cooked cereals.
- 5) Use a little syrup, molasses, or honey.
- 6) Beat up an egg and slowly stir into hot cereal before serving.
- 7) Mold cooked cereal in ramekins or custard cups and serve as pudding with milk or fruit juices.
- 8) If ready-to-serve cereals have lost their freshness, spread on a shallow pan and toast in slow oven.

Cream and vegetable soups are excellent ways of introducing supplementary foods to a baby beginning his first year. Vegetable soups are particularly valuable for their minerals and vitamins which play a vital role in the structure and working of every part of the body of the growing baby. Care should, however, be given in the preparation of vegetables, as prolonged cooking or soaking in plenty of water removes much of those valuable minerals and vitamins.

Beef, lamb, chicken and liver have been frequently recommended for children more than pork, veal, or ham. Children need an adequate supply of complete proteins which may be taken from meat; this may be introduced when a baby is about a year old. One serving of meat a day together with an egg, cereal products, and milk is sufficient to furnish the protein needed by the growing child. Meat contains not only quality proteins but also a good quantity of minerals like iron, phosphorus and sulphur. Although meat is generally considered as a poor source of vitamins, particularly Vitamin C which is not stored in the body, lean meat, kidney, sweet bread and liver are important sources of Vitamin B complex, especially niacin. Livers of marine animals contain abundant Vitamin D, while yeast, liver, and rice polishings are rich in Vitamin B complex. Vitamin C occurs widely in plant and animal tissues, but is abundant in fresh fruits and vegetables and to a less extent in meats.

FISH

Fish is of particular value in the diet of growing children because it is an economical source of protein needed for the growth of the body tissues. The protein of fish is complete and is interchangeable with meat. Lean fish or fish of the white, non-oily varieties is also more readily digested than beef and may be introduced at the age of 1 year; however, the more oily fish or canned fish may be introduced at the age of 2.

Baking, boiling, or broiling, are suitable methods of cooking fish. When given to children, care should be taken to crumble them carefully with the fingers to remove the bones.

EGGS

Because of the nutritive value of eggs, they are indispensable in the diet of children. Like milk, the protein and fat of eggs are readily digested and egg yolks contain ten times Vitamin A and twice as much Vitamin B as milk. The presence of iron and anti-rachitic Vitamin D makes egg a good and economical substitute for meat.

Eggs may be served hard-boiled, soft-boiled, poached and scrambled, cooked as ingredients or served in drinks. As early as 4 or 6 months, a baby may be given a hard-boiled yolk each day and by the time he reaches 12 months, he may be allowed to take the whole egg.

Guide in Introducing Eggs and Cheese:

Age	Quantity
3 — 9 months	A taste of yolk, gradually increased — mashed
9 — 12 months	1 whole yolk

 $\frac{1}{2}$ teaspoon vanilla

1 $\frac{1}{4}$ cups powdered sugar

Beat whites until stiff, add sugar gradually and continue beating until mixture holds its shape. Add vanilla flavoring, and drop by spoonfuls on baking pan lined with white paper. Bake in slow oven and remove paper when browned on top.

POACHED EGGS

For best results, eggs for poaching should be perfectly fresh. If the whites appear thin and runny, as they are likely to be when the eggs are not very fresh, a little vinegar or lemon juice may be added to the water (1 tablespoon to 1 cup water). This helps to coagulate the whites, but may very slightly affect the flavor.

Fill a skillet or shallow pan two-thirds full of water; add salt ($\frac{1}{2}$ teaspoon to 2 cups water) and bring to boiling point; reduce heat.

Break each egg into a cup before slipping one by one into the water. The water should cover the eggs and only as many eggs should be cooked at one time as will allow each to remain separated from the others.

When all eggs are in, cover and cook to desired degree of firmness, keeping the water simmering, not boiling. For soft-poached eggs, cook 3 to 5 minutes; the whites will be thoroughly coagulated, but the yolks, still soft inside. If firmer yolks are preferred, cook longer.

Lift eggs from water with a draining spoon. Serve immediately on hot, buttered toast, or split and toasted English muffins of crisp crusts.

Poached eggs may also be prepared in special egg-poacher pans.

POACHED EGGS AND BACON

Drain the poached eggs on a cloth. Arrange them on thin slices of bacon, well-grilled beforehand. Pour the fat from the bacon over the eggs. (Melted butter may be used if the bacon was prepared on a grill).

POACHED EGGS IN MILK

Substitute milk for water in poaching eggs. Pour the milk over each serving of poached egg on toast.

EGGS POACHED IN TOMATO SOUP: Poach 4 eggs in a can of condensed tomato soup.

POACHED EGGS IN POTATO

Bake some nice, large potatoes in the oven, without peeling them. Remove a piece from the top of each potato, and remove the insides, leaving only enough for them to remain firm. Mash a part of the pulp with butter and cream. Season. Use this as a filling for the potatoes. Place a poached egg in each potato. Cover lightly with brown sauce and brown well.

POACHED EGGS ON FISH

Make a nice creamy purée of fish. Spread it on rounds of buttered toast and surmount each by a poached egg.

SAVORY SCRAMBLED EGGS

Mix with ordinary scrambled eggs, when the scrambling is near its end, some chopped parsley, tongue or ham, or some fish, or vegetables.

FRUITS AND VEGETABLES

Fruits and vegetables are important sources of food materials that contribute to good health and good looks. They appeal to children's appetite because of their variety in color, shape, flavor and texture, but they are principally valuable in the daily diet because of their mineral, vitamin and cellulose contents which add bulk to the food, thus helping prevent constipation. Peas and beans are rich in protein although they are not sufficient to replace animal proteins in the diet of a growing child. Fruits and vegetables may be served cooked or raw and are equally indispensable factors of good nutrition. General debility and deficiency diseases are inevitable results of insufficient body-building and body-regulating vitamins and minerals.
