## FOREWORD

*The author of this collection is not a cook by profession. This therefore entail some sort of explanation why a non-professional should try to write a book about the subject—much less a subject of this kind. However, the author wishes to explain that she does not need to work for a living as she was comfortably left of by her family. Being a gourmet by inheritance and instinct, her hour for relaxation channeled to distinct and unusual Filipino food, and its ultimate conclusion; its various ways of preparation. Hence, instead of enjoying the dish gastronomically, the author collected the more popular Filipino recipes.*

*Sources of this recipes are varied and in some cases, original. The author had painstakingly gathered data from personal experiences, or in some cases, from the originators, themselves. As an example, in one of the many gatherings she has attended, the author was delighted by one of the dishes that caught her taste. This invariably resulted in the exhaustive hunt for the cook, and not until she has written down step by step and from the first cutting of the ingredients to its finished stage fit for the discriminating guest will the author release the exhausted cook. Some of the recipes were donated by other Filipino cooks, -recipes which received some alternations and modifications to suit the particular taste of the author.*

*The Chinese recipes were gathered first hand by the author from the more fastidious Chinese restaurants that abound the city. The author's natural habitat during Saturday nights are the numerous Chinese restaurants and her private list, after diligent eliminations, now contain only 5 establishments.*

*Now, the author can point the place where the best chicken mami is served, where the most appetizing birds nest soup is found, and where Pansit is most crisp.*

*Of all the total recipes enumerated in this book, many variations may be accomplished by the budding cook. The user of this book may consider this collection as master or basic recipe and she may modify the ingredients to suit their particular taste. Instead of cauliflower, one may substitute cabbage or gourd. It is all a matter of taste.*

*Therefore, it is the fervent hope of the author that this humble effort may, in any conceivable way, help in improving the average Filipino table.*

Last, add the boned chicken.

## **KNOW YOUR VEGETABLES**

As a general rule, vegetables are planted during the dry season, or after the harvest of the principal crop such as rice, sugar cane, etc... Hence, availability of fresh vegetables are profuse during the months of what we may consider summer here in the Philippines. However, more enterprising farmers make it a point to plant vegetables during rainy seasons for they command a much better price. So that we can safely say that the foregoing vegetables are available throughout the year. If one will only expend the necessary effort to look for the particular vegetable, and, if one is in a position to pay the price.

Ordinarily, filipinos supplement their fish dish with a vegetable course. These two courses have been the mainstay of the Filipino Diet. Now, the people have awakened to the benefits of meat. Pork has replaced the majority of vegetable dishes or when the cook is more enterprising, the blending of pork and vegetables have resulted in a more appetizing dish. Beef (cowmeat) is gaining favor with the middle income bracket families, while carabao meat (when young and fattened) is not only tolerated but enjoyed by the lower income families. Invariably the most used of vegetables and whose supply is also available in Manila markets are the following:

**AMPALAYA** — or Amargoso; elongated, slender to oblong, rough and wrinkled skinned gourd. It has a bitter, acidic taste which is usually squizzed out with the help of salt or saline solution. Together with either meat, pork or shrimps, it makes an excellent "guisado" dish.

**SEGADILLA** — also known as kalamismis. The young pod with the immature beans is preferred for cooking. It is about 2 to 3 inches long, with longitudinally thin wings and resemble a square in cross-section.

**PUSO NG SAGING** — Banana buds of the saba variety is the most popularly preferred kind as it boils to a natural taste at the same time retaining its whitish color. When boiled and chilled, it forms an excellent foundation for salad. Available throughout the year.

**REMOLACHAS** — or red beets is an introduced variety of tuber. It had been grown in commercial scale in Baguio before the war and shipped to Manila markets. Now the Chinese truck gardeners around Grace Park, Navotas and Malabon are the chief suppliers of Manila. It forms an excellent component of salad.

*RIMAS* — or kamansi is gaining favor as a presentable substitute for some of the gourds in stewing meat or fish. Ordinarily, the rimas (seedless) is prefered baked for meriendas or boiled in sugar syrup for sweets, and the kamansi (seeded) is prefered as admixture with meat or fish. Mostly available from February to beginning of rainy season. Of Indonesian origin.

*REPOLYO* — or cabbage is an introduced crucifer. It forms excellent vegetable whether boiled, stewed or scalded as for salad. Has been grown commercially at Trinidad valley in Baguio, in Sibul at Bulacan, and by truck gardeners around Manila. Manila markets are supplied with local produce during the dry season and the U. S. and China exports it to the country during the rainy season.

*REPOLYONG PULA* — or red cabbage is a novelty used primarily to over-dress the various salads. Its availability is sporadic and limited in the Manila markets.

*KANGKONG* — a leafy succulent vine that is allied to the camote family but surpasses it as a green. The tips and the young leaves makes an excellent green boiled or scalded. For salads or condiment of fish stew. Available throughout the year.

*CARROT* — or zanahorias in Spanish is rich in vitamin. A purplish to reddish tuber slightly smaller but similar to radish, is greatly relished for salad. Grown locally and in Baguio. Imported from the U. S. Available the year around on the better classes of cold stores.

### TIPS TO THE HOUSEWIFE

In buying unbranded hams, it is usually wise to soak such a ham or a home-cured ham overnight or for several hours in cold water to cover. Drain; cook (covered) in simmering water until tender allowing about half an hour per lb. Then remove skin and glaze.

Well-known brands of tendered smoked hams are so smoked and cured that it is no longer necessary to soak them before cooking. But, be sure your ham is the tendered kind. If the label of the ham has no baking directions or the manufacturer's cooking directions, here is one method:

Wrap the ham loosely in clean wrapping paper and place at side up, on a rack in an uncovered roasting pan. Add no water. Bake in moderate oven of 325°F as follows:

16—18 lbs. heavy .....	4—4 1/2 hrs.
12—15 lbs. heavy .....	3 1/2—4 hrs.
10— lbs. heavy .....	3 3/4 hrs.
5— lbs. heavy .....	2—3 hrs.
