INTRODUCTION

Inspired by the growing population of Filipinos in the United States and abroad, mostly professionals, I conceived the idea of compiling and writing this cookbook.

In 1938, I had known Enriqueta David Perez, as we were both working for the T.V.T. now the Manila Times. She was an inspiration to me, and her book was not even published at the time. I used to spend some Sundays with her and she taught me her favorite recipes. From then on, I became interested in learning fancy cooking. I began taking weekend lessons in the art of cooking from my aunt, who had taken courses from Mrs. Lusonhap, a teacher in Chinese cooking and from my cousin Cely Zamora.

Later, I enrolled in the Home Economics Department at the Philippine Women's University, where I intended to take my bachelor's degree. It was very unfortunate that World war II broke out and school closed in 1941. In the later part of 1942, after the occupation of the Philippines by the Japanese, the school re-opened and offered only a number of Home Economics courses. I went back to school at the time with the intention of finishing my degree. Taking Home Economics subjects during the occupation was expensive, as cooking ingredients were not readily available. I was in my third year of college when the school was bombed and had to be closed permanently.

Hindered by bombs, and lack of transportation and schools offering Home Economics, I switched my course to a B.S.E., major in English and minor in Home Economics in order to finish my degree. In 1949 I received my BSE and, in 1951, my MA degrees both at Arellano University.

Determined to still pursue my Home Economics degree, I applied for a scholarship grant in the United States in 1953 to three well known Home Economics schools. Because I was so eager to go to abroad, I took the first school which granted me the scholarship - this was at Oklahoma A & M, now Oklahoma State University in Stillwater, Oklahoma.

In December of 1953, I came to the United States and enrolled at Oklahoma A & M. Little did I know I would be confronted with so many food problems here in the United States.

One day, I was to give a 15 minute demonstration on a very simple recipe from my country. Of course, I chose a dessert, and simple as it was to me, I did not realize the problem I was going to encounter when I could not find a fresh coconut and sesame seeds for my palitao.

After the completion of my MS degree in 1955, I worked at the University Hospitals of Oklahoma City, under Mrs. Mary C. Zahasky. In 1957, I was granted an assistantship by Ohio University State to Work on my PhD. Ever since then I had been working with dietary departments of Hospitals. In June of 1963, I moved to Detroit and headed two Dietary Departments until I joined the Board of Education in September of 1966. To date I am still working with foods in the capacity of dietary consultant to several Nursing homes.

As years went by, more and more Filipinos came to the United States, not only to study and train, but also to live. Only the Chinese, Greek, Mexican, Spanish and some international stores carried some of the ingredients and these could only be found in big cities where many foreigners lived. With the growing needs to meet the demands of these foreign nationals, some big department stores began carrying some gourmet foods. Not until recently when stores expanded their lines were some ingredients made available. To these Filipinos, this book is especially written.

will improve the taste of any recipe. You can use this also for braising to keep your meats and poultry moist.

5. Cornstarch blends easier than flour and can be used as its substitute.
